EURHISFIRM

D4.4: Report on data and sources documentation and quality assessment

AUTHOR:

Johan POUKENS (University of Antwerp)

APPROVED IN 2019 BY:

Jan ANNAERT (University of Antwerp)

Wolfgang KÖNIG (Goethe University)

Angelo RIVA (Paris School of Economics)

Acknowledgments

During the compilation of the data documentation, the author received support from several persons affiliated with the EURHISFIRM-project. Mike Staunton (London Business School), John Turner (Queen's University of Belfast) and the Data Center team of SAFE House of Finance (Goethe University Frankfurt am Main) contributed (samples of) their data. Frans Buelens (University of Antwerp) and Jérémy Ducros (Paris School of Economics) provided the data documentation for the SCOB and D-FIH Databases. The author would also like to thank Jan Annaert and Frans Buelens for their general suggestions and remarks and Lana Yoo for revising the language of the report.

1 Introduction

Task 4.4 produced data and sources documentation (metadata) for a representative sample of datasets and printed serial sources from the data and sources inventory (D4.2). The data and sources documentation was produced according to the metadata standard (Data Documentation Initiative) and with the application (Colectica Designer) selected in task 4.1. We will therefore briefly reiterate the key motivations for choosing this standard and information system (see also D4.1 Information system and documentation standards) in section 2. Sections 3 and 4 then continue with a discussion of the metadata elements used for documenting sources and datasets and their organisation at the top-level of the source or the dataset (i.e. the volumes or the files) and the bottom-level of the variables (i.e. the blocks of text or columns) present in the sources and datasets. Section 5 finally includes the quality assessment. For the printed sources, we establish an order of precedence of source types (e.g. official price lists or yearbooks) for various types of information (e.g. share prices). For assessing the quality of datasets, we propose a questionnaire (Appendix 1).

The data and sources documentation itself is available in the DDI 3.2-XML format and can be downloaded from the EURHISFIRM Dataverse (https://doi.org/10.7910/DVN/WLOWOK). We recommend the free Colectica Reader software for viewing the documentation.¹ A subset of metadata elements, however, is included in Appendix 2 of this report in a more reader-friendly format.

Over 250 sources and datasets were identified during task 4.2. Producing formal documentation for all of them would not be feasible within the time allocated to task 4.4. Exhaustiveness is also unnecessary within the framework of the current design study. In the case of dataset and databases, we selected the four large databases that are also being considered for data matching and connecting in Working Package 6 (Data for Financial History or D-FIH Database, EUROFIDAI Stocks Daily Database, London Share Price Database or LSPD and Studiecentrum voor Beurs en Onderneming or SCOB Database) and three smaller datasets produced by members of the consortium. In the case of printed sources, we included a price list for each country's principal stock exchange and one yearbook. To ensure representativeness, we selected different types of yearbooks. The yearbooks for Belgium (Recueil financier), France (Annuaire Desfossés), Spain (Annuario oficial de valores) and the United Kingdom (Stock Exchange Official Year-Book) feature domestic and foreign companies listed on the stock exchanges of Brussels, Paris (Parquet and Coulisse), Madrid and London, respectively. The German (Handbuch der Deutschen Aktiengesellschaften) and Polish (Rocznik Informacyjny) yearbooks include all domestic joint-stock companies. The Dutch yearbook (Gids bij de Prijscourant) includes information on all securities listed on the Amsterdam Stock Exchange. We chose to document examples of price lists and yearbooks published during the interwar years. While the headings of columns in price lists or the titles of sections in yearbooks titles may change, their content was generally very stable. New columns and sections were only added with years in between and, once added, were removed rarely. During the interwar period, most price lists had obtained a very stable form. All selected yearbooks also had already been published for some time in this period, so their content had also taken a stable form. This representative sample of printed sources and datasets allows us to thoroughly evaluate the aptness of the chosen metadata standard and software for documenting sources and data in

¹ https://www.colectica.com/software/reader/

http://www.eurhisfirm.eu

task 4.5 and to illustrate national traditions in the representation of company information which will feed into the elaboration of data models by Work Package 5.

2 Standards and software

2.1 Data Documentation Initiative

Data Documentation Initiative (DDI) is a set of metadata standards and controlled vocabularies for documenting studies and datasets in the social sciences and economics. It has been developed within the community of social sciences data archives and is the currently preferred data documentation standard of the Consortium of European Social Science Data Archives (CESSDA).

In task 4.1, the DDI standard was chosen over other metadata standards for documenting research datasets. With increasing levels of detail, Dublin Core (DCMI), DataCite and da|ra contain a set of elements for describing datasets and printed sources at the study level (common elements include, for instance: identifiers, title, creator, publisher, abstract, coverage and format). Da|ra adds elements specific to the social sciences (for instance for the description of data collections), but only DDI includes elements for a detailed documentation of the individual variables contained in a dataset. This information at the variable level is crucial to the analysis of semantics and the elaboration of data models within EURHISFIRM.

Two versions of the DDI standard are available. For EURHISFIRM, we selected the more extensive DDI-Lifecycle (currently version 3.2) over the simpler DDI-Codebook (currently version 2.5) since it is more suitable for documenting historical printed serial sources (primarily because it supports a wider range of date formats, including dates in different calendars). Furthermore, DDI-Lifecycle includes the possibility to reuse content over several instances. For instance, variables and other metadata elements can be documented once and then referenced in several studies. Finally, DDI-Lifecycle incorporates Dublin Core for citation-type metadata. This means that within the DDI standard, there is the option to use Dublin Core elements instead of DDI elements for capturing basic bibliographic information about a source. Because Dublin Core is widely used, this greatly improves the interoperability of EURHISFIRM with third-party databases.

2.2 Colectica Designer

To produce and edit data documentation in the DDI 3.2-XML format, we chose Colectica Designer. Colectica Designer is a proprietary software, as there are no open source editors which support the DDI standard down to the variable level (the editable fields in Harvard Dataverse, for instance, mostly cover study level metadata). Since it is proprietary, Colectica Designer comes at a monthly licence cost of 59 USD per user. However, a licence is only required for editing. Viewing can be done with the free Colectica Reader. Furthermore, Colectica can import and export DDI-XML files so vendor lock-in is not an issue.

http://www.eurhisfirm.eu

3 Metadata at the source or dataset level

3.1 Organisation of metadata elements

In DDI and Colectica, the Group or Series level is used to record common metadata about a set of related StudyUnits or Studies (Group and StudyUnits is DDI terminology, Series and Studies is Colectica terminology). Optionally, an intermediate level of Sub-groups or Sub-series can be inserted between the Group or Series and StudyUnit or Study levels. The first task when adding metadata about a new source to the project is choosing the right level for documenting the source. This depends entirely on the repetitive nature of the source. Yearbook series, for instance, are documented at the Group or Series level; a dataset at the StudyUnit or Study level.

In the case of EURHISFIRM, we must also consider the traditional challenge that long-running serials pose to cataloguing. Contents, as well as titles, subtitles and/or publishers can change multiple times during their lifetime. Do these changes warrant the creation of a new group or series? The Anglo-American Cataloguing Rules (AACR2), for instance, do stipulate that a new record is created each time a significant change occurs in a serial title. To avoid multiplication of records and links between records, we propose, however, to document an entire run of a serial as a single record at the Group or Series level (see also section 2.3 below on titles).

If EURHISFIRM in the future would build a data catalogue with, for instance, images of sources, it would be sensible to document each daily or annual issue of a stock exchange price list or yearbook as a separate StudyUnit or Study. In the case of daily price lists, Sub-groups or Sub-series could also be created to group all issues from a single volume (i.e. all lists published in the same year). Presently, however, we only recorded metadata for serial sources at the Group or Series level.

3.2 Metadata elements

3.2.1 Titles

Long-running serials can present a challenge with regards to title documentation, as titles can change during their lifetime. The AACR2 method for handling title changes has already been noted in section 3.1 above. The American Library Association (ALA) cataloguing rules present a different approach to serials with multiple titles. These are catalogued as a single record under their latest title with their title history in a note. We propose to follow the ALA approach, with this alteration: In the Title element, we record a conventional or uniform title. A uniform title is assigned when a work that has been published under various titles must be represented by a single title and can, for instance, include a corporate body or place of publication (between parentheses) to distinguish serials with the same titles (relevant in the case of EURHISFIRM because both the official price lists of the Paris and Brussels stock exchanges were titled *Cours authentique*).

Example: Boletín de cotizatión (Madrid)

Subsequent titles under which a serial was published (i.e. the title history) are recorded in the AlternateTitle element. If a publication has a subtitle, the subtitles are separated from the main title by

space-colon-space (:) (we do not use the subtitle element).² Titles are followed by a time range (first year-last year of publication under a particular title) in parentheses and separated by space-semicolon-space (;).

Example: Cotización oficial del Colegio de Agentes de Cambios (1854-1885); Boletín de cotización oficial de la Bolsa de Comercio de Madrid (1886-1972); Bolsa de Comercio de Madrid : Boletín de cotización oficial (1973-1989); Bolsa de Madrid : Boletín de cotización oficial (1989-1990); Bolsa de Madrid : Boletín de cotización (1990-1992); Boletín de cotización : Bolsa de Madrid (1992-2002)

3.2.2 Creator and contributor

The creator (or author) is the entity primarily responsible for making the source or dataset, whereas the role of the contributor is more limited. Creators and contributors can be both natural persons or legal entities. These fields include the names of all creators and (if applicable) contributors. In case of a natural person, we preferentially recorded the full name. Initials are given only if the first name is unknown. The name comes first, followed by a comma (,) and the first name(s) or initial(s). In case of multiple creators or contributors, names are separated by space-semicolon-space (;).

3.2.3 Publisher

The publisher is the entity (natural person or legal entity) responsible for making the source or dataset available. The Publisher element includes the place of publication and the name of the publisher. The place of publication is recorded in the native language. In case a publication is published in more than one place, cities are separated by an ampersand (&). The place of publication and the publisher are separated by space-colon-space (:). If a serial has multiple subsequent publishers, the publishers are followed by a time range (first and last year) in parentheses and separated by space-semicolon-space (;).

Example: Madrid : Colegio de Agentes de Cambio (1854-1989) ; Sociedad Rectora Bolsa de Valores de Madrid (1989-2002)

In case a serial changes its publisher very frequently, however, the first publisher followed by [etc.] must suffice.

3.2.4 Date

The date is the point in time when the source was published. In case of serial sources described at the Group or Series level, the date will include both the start and end date (i.e. the date when it was made available for the first and last time). The DDI PublicationDate and DCMI Terms Date elements can both include a time range. Colectica, however, currently only allows a single date in the Date field of the Citation section. Pending customisation of Colectica, we recorded the start date in the Date field and the end date in a custom field EndDate. Dates of daily publication (for instance price lists) are recorded with as much precision as possible (i.e. day, month and year if available). For annual publications such as yearbooks, the

² The reason for using spaces before the punctuation is double. Firstly, it is common practice in bibliographic description (see, for instance, the International Standard Bibliographic Description rules). Secondly, it serves a technical purpose. The preceding space distinguishes added punctuation from original punctuation (for instance within a title) and facilitates future parsing into multiple fields or elements.

year of publication suffices. Colectica, however, currently only allows a full date in the Date field. Pending customisations, the start date is recorded as January 1 and the end date as December 31.

3.2.5 Abstract

The Abstract field contains a short description of the content of the source or dataset.

Example: The Boletín de cotización is the official price list of the Madrid Stock Exchange (Spanish: Bolsa de Madrid). Initially, it included daily spot prices of public bonds and corporate shares and debentures and forward prices (first or opening, highest, lowest and last or closing price only) of some public bonds, their nominal value and the amount paid-up on shares. Details on the previous price (date and quote in percentages) and on dividends and interests were added in 1903. The dividends paid during the previous and the current year were reported for shares and the interest rate and the date when the next interest payment was due for bonds. The total share capital in circulation, bid and ask prices and the annual highest and lowest price were added during the interwar period (1934 at the latest). Publication was interrupted multiple times, especially during the Spanish Civil War when no official lists were published between 17 July 1936 and 4 March 1940.

3.2.6 Type and format

The Type is the nature or genre of the source. This is a DCMI terms element with a controlled vocabulary.³ The most common values will be Text for yearbooks and price lists and Dataset for datasets and databases. Further details such as the file format (in case of datasets and databases) and the extent and size (e.g. number of volumes, height and width) can be recorded in the Format element. We currently only included information about the file format of datasets and databases.

3.2.7 Coverage

Coverage refers to a set of discovery metadata which describe the temporal, spatial and topical coverage of a source or dataset. These allow other researchers to quickly assess the usability of a source or dataset for their own research.

Topical coverage can be described by subjects and keywords. In DDI, the difference between subjects and keywords is mainly in their provenance: subjects are taken from subject classifications (e.g. the Universal Decimal Classification often used in libraries); keywords from thesauri (e.g. the Art & Architecture Thesaurus from the Getty Institute). Currently, we use the subject headings (subject categories) and additional entry terms (descriptors) from the **STW Thesaurus for Economics** (ZBW Leibniz Information Centre for Economics) as subjects and keywords.⁴

Temporal coverage is described by means of dates which delineate the start and end of the period covered by the source or dataset.

Spatial or geographical coverage can be described with a lot of details in DDI and Colectica, for instance by a set of geospatial coordinates (i.e. a bounding box). We currently limited the description of the geographical coverage, however, to the names of the principal cities, regions or states to which the contents of the source or dataset pertain and ISO 3166 codes for referring to their present-day country

⁴ http://zbw.eu/stw/version/latest/about

³ http://dublincore.org/documents/dcmi-terms/#section-7

equivalents (for instance, for Prussia, this would be mainly DE, PL and RU). Names of cities, regions and states are taken from the **Getty Thesaurus of Geographic Names**.⁵

3.2.8 Funding

Information about the grant and funding organisation which enabled the collection and organisation of the data was recorded when applicable. This is most relevant in the case of datasets and databases.

Example: Equipment of Excellence – EQUIPEX [source: D-FIH Data for Financial History]

3.2.9 Data collection and data sources

In the case of datasets and databases, it is also important to capture how data were collected (for instance, manual entry from printed sources). This includes a full enumeration of the sources of the data.

Example: End-of-month prices were collected manually from historical stock exchange price lists and newspapers:

Berliner Börsen-Zeitung (Berlin) Berliner Börsencourier (Berlin) Neumann's Cours-Tabellen (Berlin)

[Source: SAFE]

4 Metadata at the variable level

DDI and Colectica permit detailed documentation of sources and data up to the variable level. Variables are characteristics of the unit (e.g. a person, company or share) that is analysed. Variables are defined in DDI and Colectica as "columns in a rectangular data file" or "columns in a dataset". The metadata elements in the Variable class define the contents of this column.

4.1 Organisation of metadata elements

4.1.1 Datasets and databases

For the organisation of metadata elements for the description of variables from datasets, we use the standard approach from DDI and Colectica. In DDI and Colectica, variables are grouped in a logical record (Data Layout in Colectica) which describes all of the variables related to a single case or analysis unit. A logical record, in turn, belongs to a physical instance (Data File in Colectica). In a relational database with three tables for issuers, securities and share prices, for instance, the variables from each table are grouped in a separate logical record.

4.1.2 Printed sources

The logic of linking variables to logical records and logical records to data files works well for the documentation of datasets, but presents a problem for the description of some printed sources. In the case of yearbooks, for instance, different analysis units (companies and their securities) are mixed. Hence, it is impossible to organise variables from printed sources in the same way as variables for datasets without

⁵ http://www.getty.edu/research/tools/vocabularies/tgn/

http://www.eurhisfirm.eu

artificially breaking down the information. We therefore developed a different approach for the organisation of variables from printed sources. We used Variable Sets and Groups to organise the metadata in accordance with the layout of the sources. A **Variable Set** was created for each printed source. Within these Variable Sets, **Variable Groups** were created if necessary. Variable Groups are groups of variables that are linked by "some factor". In our case, this factor is the layout of the pages.

Price lists

The description of variables in price lists is straightforward and differs little from the description of variables in a dataset. Price data are generally published in a tabular form, with data organised in columns and rows. Each column in this case represents a variable and each row an issue from a particular issuer (company or public body). Price lists may, however, contain multiple tables with different columns for particular types of securities or for securities from particular types of issuers, for instance for shares and debentures (see Figure 1 and Figure 2) or for public and corporate bonds. If the source treats issuers in separate and distinct tables, different Variable Groups are created to reflect the layout of the source.

Figure 1: Prices of shares, Berliner Börsen-Zeitung (1913)

Figure 2: Prices of debentures, Berliner Börsen-Zeitung (1913)

Yearbooks

Information in yearbooks is organised in blocks of text and tables. The first block, clearly distinguished from the rest of the text by use of a larger font, bold text or capitals, is the section title which identifies the issuer (company). Well-structured yearbooks start each subsequent block of text (subsection) with a uniform subsection title (see Figure 3). Subsection titles may be omitted, however, if the content of a subsection is in a narrative form which clearly contextualises the information for the reader. The Belgian Recueil financier, for instance, always included the date of incorporation in a sentence (e.g. "Cette Société a été constituée à Anvers le 4 novembre 1884").

Darlehnsbank Aktiengesellschaft zu Augustusburg i. Erzgeb.

Gegründet: 1./10. 1889 als A.-G. Bestand seit 1866 als Vorschussverein e. G. m. u. H. u. firmierte von 1889—1899 A.-G. Darlehnsbank zu Schellenberg.

Zweck: Betrieb von Bankgeschäften aller Art.

Kapital: M. 200 000 in 192 Inh.-Aktien A à M. 1000, 40 Aktien B auf Namen à M. 200. Im ganzen M. 186 000 eingezahlt. Der R.-F. M. 69 930 wird besonders verwaltet.

Geschäftsjahr: 1./4.-31./3. Gen.-Vers.: Spät. Ende Juni.

Figure 3: Handbuch der deutschen Aktiengesellschaften (1913-1914)

Yearbooks may also include tables with multiple financial variables (for instance, securities prices, dividends, profits) for several fiscal years (see Figure 4). Balance sheets and profit-and-loss accounts present another form of nested tabular information. Financial statements, however, are particularly challenging in this respect. Unless the items were harmonised by the publisher, the number of different variables is endless as there was no regulation of financial reporting for over three-quarters of the post-1815 period. We therefore only include variables in these Variable Groups if the posts were harmonised by the publisher. Otherwise, we include Variable Groups without variables to indicate the presence of these financial statements.

ANNÉES	-	PL. B.	CHIFFRE D'AFFAIRES	BÉNÉFICES BRUTS	AMORTIS. ET RÉS.	BÉNÉFICES NETS	DIVDENDE PAR ACTION
1925	520	430	2.246.103	1.055.913	36.986	97.390	10
1926	557	400		1	3	,	10 D
1927	48,0	s.c.	*	,	D		D
1928	2	D	>>	D	>	. 0	D

Figure 4: Table with financial information (e.g. share prices, net profit and dividend), Annuaire Desfossés (1929)

Following the approach of Working Package 7, we created Variable Groups for each level, i.e. one Variable Group for the information in the section title (level 1), one Variable Group for the information in the subsections (level 2) and as many Variable Groups as there are tables (level 3) (Adam et al., 2019). For the example in Figure 5, the Variable Group at level one includes the name of the company (i.e. *Altos Hornos de Vizcaya*). The Variable Group at level two includes (amongst others): date of incorporation (constitución), purpose (objeto), registered office address (domicilio), fiscal year (ejercicio), duration (duración), capital (i.e. capital), shares (i.e. acciones) and allocation of profit (reparto de beneficios). For the information at level three (tables), a Variable Group with the title Tax-free dividends (Dividendos libres de impuestos) was created in this instance. This Variable Group contains the following variables: year (años), type of dividend (dividendos), net amount (líquido), total amount (total), percent of nominal value (tanto por 100), coupon number (número del cupón) and payment date (fecha del pago).

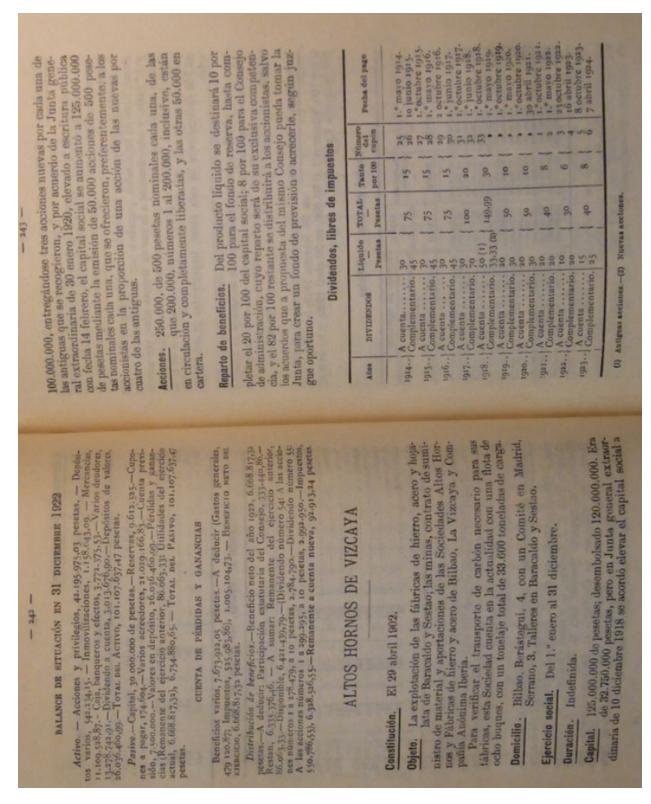

Figure 5: Levels of information, Annuario oficial de valores (1925)

4.2 Metadata elements

For each individual **Variable** (from printed sources and datasets), the following four metadata elements are included: Name, Label, Description and Representation Type. The metadata elements for describing variables are the same for datasets and printed sources.

4.2.1 Name

The VariableName element (Name in Colectica) contains the column heading or section title, exactly as it is indicated in the source document or data file.

Example: SHARES_NUMBER [source: *EIUROFIDAI Stock Daily Database*]

One of the common challenges of documenting variables from printed price lists are hierarchically structured column headings. Columns may be divided into two or more sub-columns (which may be subdivided even further) (see Figure 6). The headings of these sub-columns are meaningful if they are related to the headings of columns higher up in the hierarchy.

Figure 6: Example of hierarchically structured column headings, Cours authentique (Paris)

In this case, we chose to precede the headings of the sub-columns by the headings of columns higher up in the hierarchy. Column headings are separated by space-vertical dash-space (|).

Example: Intérêts et dividendes | Dernier coupon payé | Impôts à déduire [source: *Cours authentique* (Paris)]

If a column or section has no heading or title, we also leave the VariableName element empty and include only the Label element.

4.2.2 Label

The Label element contains a short description (a few words) of what the variable represents. For the documentation, we either took the label from the manual describing the data or created our own label if there was no manual.

Example: Company number [Label for variable G1, source: London Share Price Database)]

4.2.3 Description

The Description element may contain additional details on the representation of the variable, if necessary, for the correct interpretation of the variable.

http://www.eurhisfirm.eu

Example: Total number of shares available, used to calculate the market capitalization of the firm by multiplying the number of shares by the (unadjusted) price. [Description for variable SHARES_NUMBER, source: *Eurofidai Stocks Daily Database*]

4.2.4 Representation Type

The ValueRepresentation element (Representation Type in Colectica) describes how the variable is represented, i.e. defines the possible values of a variable. It can currently take one of these four values in Colectica: Code, Date/Time, Numeric or Text. Each type includes several subtypes — for instance, Integer or Decimal in case of Numeric data. DDI has controlled vocabularies for the Date and Numeric representations. These are included in Colectica, but neither DDI nor Colectica offers a Fractional Type for numeric variables. We therefore used Other in case of fractional notation of share prices.

The Scale, Measurement Unit and Aggregation Method elements are also important elements for describing variables, for instance in the case of share prices. The Measurement Unit element is used to record the unit in which the variable is measured. In case of a share price, this may be in a particular currency or as a percentage of a nominal value. If the share price is a highest, lowest or average price, this can be indicated in the Aggregation Method element. The Scale element is used in case numbers or amounts have to be multiplied by a factor to arrive at the actual amount or number. In balance sheets, for instance, amounts are often expressed in thousands; and during hyperinflation, German share prices were expressed in millions. In these instances, Scale would respectively be 1,000 or 1,000,000.

5 Quality assessment

5.1 Printed sources

Governance, financial market and accounting information is available in various types of printed serial sources. In task 4.4, official government publications (gazettes), stock exchange price lists and yearbooks on joint-stock companies and publicly traded companies were identified as the three main sources of long-term historical company data. The authenticity and accuracy of the information, however, varies.

Official government publications and stock exchange price lists have an authoritative character. In most countries, the incorporation of a joint-stock company is possibly only realised by public deed. The authenticity of the constitutional documents is guaranteed by the notary who served both as an independent and impartial witness to and custodian of the deed of incorporation and articles of association. To ensure their availability to third-parties, constitutional documents or excerpts thereof also have to be deposed in a public business register and published in an official publication with an equally authentic character. All modifications and amendments of the constitutional documents must follow the same route. To protect shareholders and third-parties, other company information such as the appointment of directors and plenipotentiaries and financial statements also had to be published in the same or specialised official gazettes. In the case of stock exchange price lists, the accuracy of the published

⁶ DDI Alliance. (2018). DDI Controlled Vocabulary for Date Type. Accessed 09/04/2019. http://www.ddialliance.org/Specification/DDI-CV/DateType_1.1.html; DDI Alliance. (2018). DDI Controlled Vocabulary for Numeric Type. Accessed 09/04/2019. http://www.ddialliance.org/Specification/DDI-CV/NumericType_1.0.html

prices is guaranteed by official brokers who were appointed or confirmed by the government and equally served as impartial intermediaries to the transaction. The official or authentic character of price lists is reflected in their title (for instance, *Daily Official List* in London, *Officiële Prijscourant* in Amsterdam, *Cours authenticque* in Brussels and Paris and *Boletín Oficial* in Madrid).

While some **yearbooks** published by stock exchange authorities (for instance, the London Stock Exchange's *Official Intelligence* and *Official Year-book* and Madrid's *Anuario oficial*) also claim an official character, they do not have the same legal status as official gazettes and price lists. This is equally the case for yearbooks published by private publishers. Yearbooks were published primarily for the convenience of investors. They bring together governance, financial market and accounting information about public and private issuers of securities or joint-stock companies. This information is taken from various sources, including the aforementioned official publications and voluntary disclosures by the companies, and presented in a uniform manner. Their broad and consistent treatment of otherwise dispersed data is not only the yearbooks' greatest strength, but also a weakness because it widens the margin for errors and necessarily involves the selection and transformation of information. Yearbooks, for instance, publish only a few prices for each security per year (usually the end-of-year and/or annual highest and lowest price).

In the following subsections, the preferred types of sources for different types of information will be discussed. In general, most types of information can be found in several types of sources. The differences between source types are not so much in the type of information, but in the amount of detail and the frequency with which information is published. The preferred source type is the source with the greatest amount of detail.

5.1.1 Identification

The unambiguous identification of companies is a core issue in the development of the EURHISFIRM infrastructure. This requires complete data on the name, legal form, incorporation and dissolution dates, registered address, purpose and identification codes (if these exist) of companies. Only **government publications** can offer the necessary degree of accuracy. Names in yearbooks are often translated and Romanised, for instance, or only the locality of the registered address and the year of incorporation are given.

5.1.2 Corporate board members and officials

Identification issues (homonyms, for instance) also arise in the case of directors, supervisory board members, managers and other company officials. This equally requires that as much information as possible is collected about each individual. This includes the full name, titles, profession, domicile and, ideally, date of birth and death and sex. While no evidence of the latter was found in any source type, **government publications** again provide a more complete set of personal data for identification and disambiguation of natural persons (including first names, professions, addresses, ...). In the Belgian case, for instance, the deeds of incorporation published in the official *Recueil special* at the end of the nineteenth century consistently contain the first and last name, profession and locality of the domicile of directors whereas the yearbook *Recueil financier* initially only published the initial and name (first name and locality of domicile were included more frequently from the beginning of the nineteenth century).

5.1.3 Equity and debenture capital

The initial amount of equity or share capital and its division in shares can be found in the articles of association. Any modification (increase or decrease) of the equity capital in a joint-stock company constituted a change of the articles of association. Consequentially, it had to be approved by the shareholders and published in official government publications. Some capital operations, such as the redemption of shares, however, could be effected without intervention of the assembly of shareholders and were also not publicised. **Yearbooks** therefore may present a more complete history of share capital than official publications. The same holds true for the history of debenture capital because in some companies, the directors could autonomously decide to borrow up to the limit set by the articles of association or shareholders. The number of shares issued or the amount of a debenture loan and numbers or amounts outstanding can also be found in some stock exchange price lists. Equally important in this respect is the amount paid-up on shares. As directors could call unpaid amounts, this is also not captured by official publications. The paid-up value of shares may be reported in price lists and yearbooks, however.

5.1.4 Market prices and dividends

Stock exchange price lists are the most complete source of information on market prices of shares and bonds and dividends. Yearbooks published prices almost exclusively on an annual basis (the monthly prices in the Madrid Stock Exchange Official Yearbook are exceptional). Daily prices can be found almost exclusively in stock exchange price lists and newspapers. If price lists are available, these have preference over newspapers. Because of editorial policies, the latter may have published only a time-varying selection of securities and prices (Hannah, 2018). Dividends and coupon numbers may equally be reported both in yearbooks and price lists. Important information such as the ex-dividend or payment dates are found only in some price lists.

5.1.5 Financial statements

The quality of historical financial statements in general is difficult to assess. Because of the absence of legislation and regulation before the 1970s, there is no contemporary standard for comparison. The only possible comparison is between the company's financial statements in their own annual reports presented to shareholders at the general assembly and the financial statements disclosed to business registers and to publishers of yearbooks. In the Belgian case, the official *Recueil spécial* is regarded as "the most reliable source of Belgian financial statement data for that period". The balance sheet and profit-and-loss accounts reported in the *Recueil spécial* were identical to the ones presented in the annual report to shareholders (Van Overfelt, Annaert, De Ceuster, & Deloof, 2009). The items and amounts of the balance sheets and profit-and-loss accounts disclosed in the *Recueil spécial* were also identical to those published in the *Recueil financier*. Absent regulation, it seems reasonable to assume that companies produced only one balance sheet and profit-and-loss account for external use and that financial statements published in annual accounts, government publications and yearbooks were identical. Only the French Desfossés yearbook performed some harmonisation of the balance sheets received from 1935.

5.1.6 Activities

While the articles of association contain a description of the statutory purpose or the mission statement of the company, they remain silent about the actual activities of the company. Yearbooks to some extent

may include a short chronicle of important investments, production figures, turnover, etcetera. More details might be included in the annual reports published by the companies.

5.1.7 Geographical information

Apart from the aforementioned registered address, geographical information is found mostly in yearbooks. The location of branches and production facilities such as factories, mines and quarries can for instance only be found in articles of association if they were contributed to the company in kind at incorporation. More details about subsequent acquisitions might be included in the annual reports published by the companies.

5.2 Databases and datasets

A questionnaire (Appendix 3) has been developed for the quality assessment of databases and datasets. This questionnaire addresses technical aspects of the data (applications and file formats), the coverage of the dataset (topical, spatial and temporal), the sources of the data and details about various types of information. Also important is the inquiry into the distinction between original and transformed data. A dataset might for instance include only returns (transformed data) or also share prices and dividends (original data). The constant progress of research methods and techniques necessitates the preservation of original data for future re-examination. EURHISFIRM should therefore focus first and foremost on the integration of datasets and databases with original data. All of the large databases surveyed (i.e. SCOB, D-FIH, EUROFIDAI and LSPD) store original data alongside transformed data.

6 Conclusion

Task 4.4 produced homogenous data documentation for the principal existing datasets and databases and characterized the features of a representative sample of printed serial sources on publicly traded companies according to the Data Documentation Initiative Lifecycle standard (DDI 3.2). The data and sources documentation shows the multiplicity of models by which historical printed sources have published data about companies and securities and of the data formats used by researchers and research projects for storing this data in datasets and databases. The challenge for Working Package 5 will be the development of an over-arching, common data model that enables the harmonization and integration of data from heterogeneous datasets and sources. Going forward, EURHISFIRM can expect to integrate largely populated structured databases with long-term historical data such as the Belgian (SCOB) and French (D-FIH) databases; other databases similar in character with more recent data such as EUROFIDAI and the LSPD; and smaller, less comprehensive datasets collected by individuals or small teams. Our selection of datasets ensures a representative sample as a starting point for Working Package 5. The data formats used by comprehensive databases which store information about securities, companies and persons can inspire the elaboration of the common metadata model, but are not comprehensive in the sense that they cover mostly the Belgian and French cases. EUROFIDAI and LSPD provide additional (inter)national data models, but they mostly store information about shares. Hence, there is still a lot of information to be gleaned from printed historical sources. Most variables or data elements found in printed sources are compounded by different types of information. A registered office address, for instance, may include a locality (city), street and number. Even more complex is a debenture loan which

typically consists of a name, class, total amount, number and nominal value of bonds, interest rate, interest or coupon payment dates, date of issue, maturity date, maturity premium, method of redemption, annual draw date, outstanding numbers or amounts and prices. Working Package 5 will decompose these complex data elements, identify them as static or dynamic information and develop controlled vocabularies for some elements.

8 Appendices

8.1 Database questionnaire (Appendix 1)

Applications and file formats

- 1. What application (database or software) has been used to construct the dataset (e.g. Excel, Access, Oracle, MySQL, ...)?
- 2. In which file formats are data available (e.g. .xsl, .csv, .xml, ...)?

Coverage

- 3. Which entities, for instance corporations, persons (e.g. directors), securities, exchange rates, commodities (e.g. gold) or macro-economic variables (e.g. inflation, GDP, population figures), are covered by the database?
- 4. Which countries are covered by the database?
- 5. Which stock exchanges and securities markets (e.g. spot market, forward market) are covered by the database?
- 6. For which period (start and end date) are data included in the database (please specify for each of the covered entities)?

Original and/or transformed data

- 7. Does the dataset contain both original and transformed data, only original data or only transformed data?
- 8. How are original data distinguished from transformed data?
- 9. Can the original presentation of the data be reconstructed from the dataset?
- 10. Do the sources of the data contain original data, or did the compilers of the data source already perform selections, calculations and transformations of the data? For instance: the compilers of a stock exchange yearbook (the source) often select only one or two share prices (e.g. end of year or annual highest and lowest) whereas the stock exchange daily list (the original data) contain daily prices.

Issuers/company history

- 11. Which categories of issuers (e.g. government/public, corporate/private, industrials, domestic, ...) are included in the dataset?
- 12. What is the source of the data on companies/issuers (e.g. stock exchange yearbooks, articles of association, ...)?
- 13. What information on issuers (e.g. name, legal form, registered address, start and end date, mergers, acquisitions, production data ...) is included in the database?
- 14. Are data about the investment portfolio of issuers included in the dataset?

Persons

- 15. Which categories of persons (e.g. directors, managers, ...) are included in the dataset?
- 16. What is the source of the data on persons (e.g. stock exchange yearbooks, official publications, biographical dictionaries ...)?

http://www.eurhisfirm.eu

- 17. What information on persons (e.g. name, first name, initials, titles, address, function, date of birth and date) is included in the database?
- 18. Are persons linked to issuers/companies?

Securities

General

- 19. What is the source of the data on securities (e.g. stock exchange official lists, newspapers, ...)?
- 20. Does the database include only a selection/sample of securities (e.g. blue chip stocks, common stock only, ...) or all listed securities (e.g. bonds, debentures and shares)?
- 21. How can securities be identified (e.g. name or unique identifier such as ISIN)?
- 22. Are securities linked to their issuers?
- 23. Are securities classified according to sector or industry? Which sector or industry classification is used (e.g. SIC)? How is the sector or industry classification implemented (e.g. subclasses grouped into broader categories)?
- 24. Are securities classified according to country of origin (i.e. the country in which the issuer has its registered address)?

Securities types and classes

- 25. Are different types (e.g. bonds, debentures, shares) and classes of securities (e.g. fixed rate, variable rate or convertible bonds; ordinary, preference, founder's shares)
- 26. Are definitions of securities types and classes available?

Securities prices

- 27. Which prices are included in the database (e.g. opening, highest, lowest, closing)?
- 28. What is the frequency of the price data (e.g. daily, monthly, annual)?
- 29. How are prices quoted (e.g. per unit, as a percentage of nominal value)? In which currency are unit prices quoted?
- 30. Were prices adjusted (e.g. for corporate events)? Are unadjusted prices included in the database in case adjustments were made?

Returns

- 31. Is information on the amount of dividends paid and/or interest rates included in the database? Are this gross or net returns?
- 32. Are ex-dividend dates, dividend and interest payment dates included in the database?
- 33. In which currency are the amounts of dividends given? Are returns given in the same currency as prices?
- 34. Is information on the taxation of dividends and interest (e.g. tax rates) included in the dataset?

Number and value of stock and bonds

- 35. Is the number of securities issued and outstanding and/or market capitalisation included in the database?
- 36. Are the nominal value and the amount paid-up on securities included in the database?
- 37. Are trading volumes (number and/or value of shares traded) included in the database?

Capital operations

38. Is information about corporate capital operations (e.g. for stock splits, reverse splits, subscription rights, attribution rights, ...) included in the database?

http://www.eurhisfirm.eu

Accounting data

- 39. Are accounting data included in the dataset?
- 40. Which accounting data are included? Balance sheets? Profit-and-loss accounts?
- 41. Are accounting data transformed, either by the publisher of the original source document or by the author of the dataset?

Macroeconomic data

- 42. Which macroeconomic data are included in the database?
- 43. What is the source of macroeconomic data included in the database?

8.2 EURHISFIRM Data and sources documentation (appendix 2)

Appendix 2 first includes the data and sources documentation proper. This section, that starts on appendix page 1 and ends on page 185, contains metadata at the source or dataset level for the sample of printed sources and datasets and variable level metadata for datasets, but not for sources (lists of possible values for Code variables can be found from appendix page 136). The description of the main data elements found in selected printed sources (i.e. the source Variables) starts on page 185 of Appendix 2. If the DDI 3.2-XML file (https://doi.org/10.7910/DVN/WLOWOK) is viewed in Colectica Reader, the contents of Appendix 2 can easily be located using the Navigator in the left pane of the screen. The full set of metadata on printed sources and datasets can be found under "Series" (printed sources) and "Studies" (datasets). The source Variables are located in a Metadata Package.

Throughout the data and sources documentation, symbols are used to identify the class of the items being described. These symbols are explained in the table below.

Symbol	Class	Description
{ □ }	Series	A group of repeated studies
	Study	A data-centric study
	Dataset	A file containing data
₹	Variable Set or Variable Group	A set or group of related variables
	Variable	A reusable, logical description of a column of data
1 2 3	Codes	Associates a numeric or alphanumeric value with a category

Prijscourant (Amsterdam)

Abstract

The Prijscourant, the official list of the Amsterdam Stock Exchange, was published by various publishers on behalf of the Amsterdam Stock Exchange's governing bodies since 1796. From 1 July 1876, the newly established Vereeniging voor den Effectenhandel took over the publication. It was published two or three times per week until 1897 and daily from 1898. The official lists initially included only the type, interest rate and price of securities. Prices were quoted with wide margins in Prijscourant as the lists only mention the lowest and highest price of the day. From 1813, quotations of the previous two days were also published. The closing price was mentioned in a third column ("Gebl.", abbr. of "Gebleven koers") for the most recent day from 1829 and for every day from 1832. From 1886, the previous price was also included. This was the mean of the highest and lowest price on the last day a security was traded. One year earlier, in 1885, nominal values and coupon dates had already been included and coupon numbers were added in 1898. In the 1920s, the Vereeniging experimented with the publication of more frequent quotations for frequently traded securities. The publication of the lowest, highest and closing prices was first substituted by the publication of the opening price and subsequent prices for four timeslots on 7 November 1924. This was later expanded to five timeslots in 1925 and finally to seven in 1929. For less frequently traded securities, the price at mid-day (11:30 until 12:05) was published. The turnover (in guilders) of the previous day was included on 10 September 1940.

Gids bij de Prijscourant (Amsterdam)

Abstract

The Gids bij de Prijscourant was published on behalf of the Vereniging voor den Effectenhandel since 1890. It focuses mainly on financial information and much less on governance information. For each security listed in the Prijscourant, the official price list of the Amsterdam Stock Exchange, the Gids includes the class (for instance common or preferred stock), the name, the location and purpose of the issuer, and sometimes the date of incorporation, and the location and names of branches and subsidiaries. In the case of shares, there are details on capital such as the amount of authorised, outstanding and listed capital; the nominal value of shares; the amount of the reserves; a chronicle of capital operations (for instance new emissions); and dividends paid during the previous years. For bonds, the Gids includes amongst other things detailed information about redemptions. For both stocks and bonds, the annual lowest and highest price during the previous years are reported (the time span of retrospective information varies, but usually ranges between three and five years). Later editions of the Gids also contain retrospective accounting information for a limited number of companies in the form of balance sheets and profit-and-loss statements. No names of directors are included in the Gids.

Berliner Börsen-Zeitung (Berlin)

Abstract

The newspaper Berliner Börsen-Zeiting mainly published prices of securities traded at the Berlin Stock Exchange (Berliner Börse, see below), information on the mortgage market, reports on national and international industry and trade, in addition to political news with an emphasis on the national and world economy. The Berliner Börsen-Zeitung printed the complete official price list (Kurszettel) of the Berlin Stock Exchange in its evening edition. The price list included information on securities prices, interest and dividends.

Handbuch der deutschen Aktiengesellschaften

Abstract

The Handbuch is a joint-stock company yearbook for Germany. Each volume of the Handbuch contains comprehensive governance and financial information about both listed and non-listed joint-stock companies (Aktiengesellschaften in German). Companies are sorted by industry. The information includes: year of incorporation, purpose, capital, a brief chronicle of important events in the company's history (for instance, acquisitions and mergers, changes in the capital structure through capital increases or reductions and the entry of major investors), general assembly date, shareholder's voting rights and information on corporate boards, including the composition of the management board (German: Vorstand) and supervisory board (German: Geschäftleitung). In addition to governance information, the Handbuch includes data on the development of the dividend paid by the company, and in the case of publicly traded companies, also on the development of stock quotes (the last quote of the year for the previous ten years was included), as well as the stock exchanges where the shares of the company are listed. Detailed accounting information is available in the form of balance sheets and profit-and-loss accounts for the previous year. In some cases, there is also information on mortgages, workers, salaries and, if applicable, liquidators.

Cours authentique (Bruxelles)

Abstract

The Cours authentique is the official price lists of the Brussels Stock Exchange (French: Bourse de Bruxelles). It was published daily. Initially, it included spot prices (or bid and/or ask prices) of mainly public bonds, in addition to nominal values and interest rates. Over time, the range of quoted of securities included corporate shares and debentures as well. Detailed information on dividends was added in 1873. This included the date, amount and coupon number of the previous dividend. The previous price and the number (or amount) of shares and bonds admitted to and circulating on the stock exchange were reported from 1878. Information about taxation of corporate bonds was included from 1924. The existance of multiple voting shares was indicated by means of an asterisk, finally, from 24 March 1930 until the abolishment of multiple voting shares in 1934.

Recueil financier (Bruxelles)

Abstract

The Receuil financier is a yearbook with summary governance, financial market and accounting information on companies listed on the Brussels Stock Exchange. The company information in the Recueil financier is extremely detailed, but poorly structured. It includes basic governance data such as date of incorporation, registered office, balance sheet and general assembly dates and names of directors and statutory auditors. This is accompagnied by financial information on capital, debt, dividends and securities prices and a recent balance sheet and profit-and-loss account. Very interesting is the chronicle of important events which focusses not only on capital and debt operations, but also on the company's activities, investments, takeovers and mergers. Most volumes are accompanied by an appendix with additional information about managers and directors (Table alphabétique des administrateurs et commissaires), listing for instance their address and occupation. In addition to company information, the Recueil financier also includes information on issues of bonds by public bodies (states, provinces and municipalities, for instance).

Stock Exchange Daily Official List (London)

Abstract

The Stock Exchange Daily Official List (SEDOL) is a daily publication of official quotations for all securities traded on the London Stock Exchange. The contents of the Stock Exchange Daily Official List are remarkably stable. For every listed security, it gives the name, the number or amount authorised and issued, the nominal value, subsequent prices paid, a closing quotation, the interest payment date (for fixed income securities), the ex-dividend or exinterest date and the interest rate or the amount of the last dividend. During and after the First World War, the official list also included the mean price on the eve of the outbreak of the war (27 July 1914). The Stock Exchange stopped printing this value after 1921 The figures for the number of shares authorised and issued are no longer reported after 1946.

Stock Exchange Official Year-book (London)

Abstract

The Stock Exchange Official Year-book was first published in 1875 by Thomas Skinner as the Stock Exchange Year-book. In 1934, it merged with the Stock Exchange Official Intelligence (first published as Burdett's Official Intelligence in 1882) and became the official yearbook (issued under the sanction of the Committe of the Stock Exchange) for the London Stock Exchange. It contains a mixture of summary governance and financial market information, including company name, address of registered office, names of directors and other officials and service providers, date of registration (incorporation), purpose and activities, authorised and subscribed capital (including particulars of shares such as class, number, nominal value and amount called, capital operations, other exchanges where shares were listed, share prices and voting rights) and debenture loans (similar details as for shares). Accounting information is limited to the duration of the fiscal year, the date of submission of accounts, and some details on the allocation of profits and dividends paid. No financial statements are included, however. In

addition to information on listed companies, the Year-book also includes particulars on government and municipal loans.

Boletín de cotizatión (Madrid)

Abstract

The Boletín de cotizatión is the official price list of the Madrid Stock Exchange (Spanish: Bolsa de Madrid). Initially, it included daily spot prices of public bonds and corporate shares and debentures and forward prices (first or opening, highest, lowest and last or closing price only) of some public bonds, their nominal value and the amount paid-up on shares. Details on the previous price (date and quote in percentages) and on dividends and interests were added in 1903. The dividends paid during the previous and the current year were reported for shares and the interest rate and the date when the next interest payment was due for bonds. The total share capital in circulation, bid and ask prices and the annual highest and lowest price were added during the interwar period (1934 at the latest). Publication was interrupted multiple times, especially during the Spanish Civil War when no official lists were published between 17 July 1936 and 4 March 1940.

Anuario oficial de valores de la Bolsa de Madrid

Abstract

The Anuario Oficial and its successors are the official yearbooks of the Madrid Stock Exchange and, from 1943 until 1961, also for the Barcelona Stock Exchange. They contain summary governance, accounting and financial market information in a clearly structured manner. For each listed company, the information provided in the Anuarios is: date of incorporation; purpose; registered address; fiscal year; duration; details on capital (authorised and paid-up); details on shares and bonds (number of shares issued; numbers of shares; nominal value; date of issue; number in circulation and characteristics such as common, preferred or founder shares, and to bearer or registered); statutory rules for the distribution of profits; dividends paid; date of admission of stocks and bonds to the stock exchange (by issue); a brief history of capital, reserves and profits (in a tabular form); annual highest and lowest prices; last spot and forward prices of shares and bonds for the previous five years; the same for the previous year on a monthly basis; board of directors members; and the balance sheet and profit-and-loss account for the previous year. Other information in the Anuarios consists of the lists of stockbrokers active in Madrid, Barcelona and Bilbao, and detailed information on domestic and foreign government securities traded in Madrid.

Cours authentique (Paris)

Abstract

The arrêté of 15 pluviôse an IV (4 February 1796) bestowed the price list that was published by the Compagnie des Agents de Change since 24 September 1795 with an official status. The Cours authentique was published daily. Its structure changed significantly over time with the evolution of the Paris financial market. The early official lists at the end of the eighteenth century contained mainly gold and silver prices, foreign and domestic exchange rates, and (spot) prices of government and a few corporate securities. Then, progressively, more prices were added. Forward and repo prices were included in 1840. In addition to prices, the nominal and paid-up value of securities and the "date de jouissance" (the date at which the owner began to enjoy dividends or interest) were also published in the official list. In 1857, the closing spot and forward prices of the previous day were included. The amount of the dividend paid during the previous fiscal year was included in 1862, coupon numbers and the issue price in 1866. Thereafter, new information was added only in 1920. The most important addition was the number of securities listed on the market for each stock. The highest and lowest spot prices of the previous year were also included. Moreover, a table of subscription rights and the Avis et Décisions (the register of the decisions of the Agents de Change, previously published separately) were reported at the end of the list starting from 1920. The Avis et Décisions reported the most relevant events about the stock market and the issuers (IPOs, SEOs, payment of coupons, splits, etcetera).

Annuaire Desfossés (Paris)

Abstract

The Desfossés yearbooks provide information on the issuers of securities listed on the Paris Stock Exchange and the Coulisse. For listed companies, the yearbooks publish not only governance information such as legal form, purpose, registered office address and corporate governance rules on the distribution of profits and the general meetings of the shareholders (including details on voting rights of different classes of shares), but also financial market information such as a chronicle of its equity capital. This includes both the original equity capital and all subsequent capital operations (increases or reductions of capital). It also contains information on their securities. Descriptions of both shares and debentures issued by the companies are provided. They also include the names and functions of all members of the boards of directors, simplified balance sheets and profit-and-loss accounts. Additionally, these yearbooks provide information about public issuers such as states, regions, départments or municipalities (for instance their financial situation) and the securities they issued.

Giełda Pieniężna w Warszawie (Warsaw)

Abstract

The Warsaw Money Exchange published quotations for the most important shares in its annual report. For the most frequently traded shares, these annual reports provide nominal values, daily quotations, monthly highest and lowest prices, the average price, the total number of quotations during the month and an index number. In addition to quotations, the annual reports also contain some details on all listed companies. The amount of information varies between years, but generally includes: year of introduction, name in Polish and in French, nominal value of shares and the amount of capital and number of shares circulating on the exchange. For some years, the total amount of capital and total number of shares are also mentioned. For other years, the end-of-year price and total market capitalisation at the end of the year are included.

Rocznik Informacyjny o Spółkach Akcyjnych w Polsce

Abstract

The Rocznik Informacyjny was a joint-stock company yearbook with summary governance, financial market and accounting information. It was published for only two years in 1929 and 1930 in Polish and French. It lists for each joint-stock company (both listed and non-listed) in the Polish Republic: the name, the year of incorporation, the registered address, the names of directors, supervisory board members and managers, the location of branches, purpose, products and annual production or turnover, details on capital (amount of authorised share capital, nominal value and type of shares, e.g. bearer or registered), the stock exchanges on which shares are listed (if applicable) and a balance sheet.

British stock market returns, 1825-1870

Abstract

This dataset includes end-of-month share prices, dividends, capitalisation data (i.e. number of issued shares, nominal and paid-up value) and returns for common equity stocks reported in the Course of the Exchange, the official price list for the London Stock Exchange.

Creator: Acheson, Graeme G.; Hickson, Charles R.; Turner, John D.; Ye, Qing

Data Collection

British stock market returns, 1825-1870

Collection Events

Mode of Collection

Share prices were collected manually from historical sources.

Action to Minimize Losses

Each stock price series was analyzed individually so as to pick up data-inputting errors or printing mistakes in the Course of the Exchange. If a share price was substantially out of line with prices either side of it, the Course of the Exchange was double-checked, and in the event that it wasn't a data-inputting error, it was deleted and the previous reported price was used as the current month's price. This, however, was extremely uncommon.

Data Sources

Course of the Exchange

The Railway Times

British stock market returns, 1825-1870

Variable Count

15

d companyname - Company name	
Туре	Text
Description	A short name for the issuing company.

companyid - Company identification code	
Туре	Numeric (Integer)
Description	A number identifying the issuing company.

industryID - Industry code	
Туре	Code
Description	A coded classification of the industry in which the issuing company was active. The classification is taken from the Course of the Exchange.

₫ Date	
Туре	YearMonth
Description	The year and month from which the values of the share price and other variables are taken.

₫ Dividend paid	
Туре	Numeric (Integer)
Measurement Unit	British pound
Description	This is the annual dividend per share.

🗊 number of shares - Number of shares issued	
Туре	Numeric (Integer)
Description	The number of shares issued is used for the calculation of market capitalisation and the total paid capital.

■ nominal value - Nominal value of shares	
Туре	Numeric (Integer)
Measurement Unit	British pound
Description	Par or face value of shares

🔁 paid up capital - Paid-up value of shares	
Туре	Numeric (Integer)
Measurement Unit	British pound
Description	Amount paid-up on shares

for price - Share price	
Туре	Numeric (Integer)
Measurement Unit	British pound
Description	Last share price of the month reported

■ mkt cap - Market capitalisation	
Туре	Numeric (Integer)
Measurement Unit	British pound
Description	This is the number of shares issued multiplied by the share price at the end of the month.

🔁 total pd cap - Total amount of paid-up capital	
Туре	Numeric (Integer)

Measurement Unit	British pound
Description	This is the number of shares issued multiplied by the amount paid-up value of shares.

div yield - Monthly dividend yield	
Туре	Numeric (Integer)
Description	The monthly dividend yield for a share was obtained by dividing one-twelfth of the annual dividend by the previous month's share price.

🔁 cap app - Capital appreciation	
Туре	Numeric (Integer)
Description	Relative change in the share price, including price changes due to changes in the paid- up value of shares.

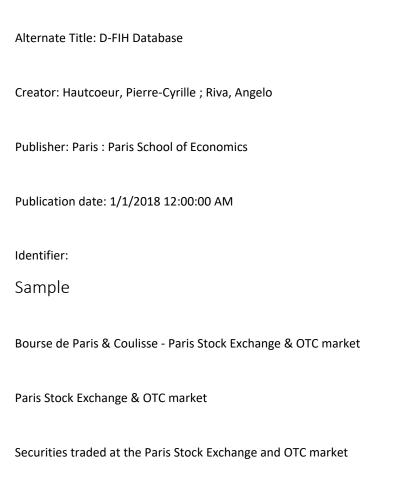

■ cap app_A - Capital appreciation	
Туре	Numeric (Integer)
Description	Relative change in the share price, excluding price changes due to changes in the paid-up value of shares.

₫ Total return	
Туре	Numeric (Integer)
Description	The total return of a share is the sum of capital appreciation and dividend yield.

Data For Financial History Database (Paris)

Abstract

The D-FIH Database was developed within the D-FIH project (short for Données Financières Historiques in French and Data for Financial History in English). It was modeled after the Belgian SCOB Database (with significant alterations and additions to make it more appropriate for the French case). The database includes information on securities and other assets (e.g. currency exchange rates and precious metals) listed on the official Paris Stock Exchange (Parquet) and the OTC market (Coulisse), as well as on their issuers from 1795 to 1976. The database includes bi-weekly prices (cash, forward, "reports" or short-term collateralised loans, and options), dividends and other information (such as securities transactions) necessary for the establishment of homogeneous price series over time. It also charts the legal history of the company (date of foundation and evolution of the legal status), the corporate governance rules, the registered office, the directors, simplified balance sheets, etcetera as well as information on public issuers (e.g. the budgetary situation and any guarantees). The data and sources can also be visualised online (https://dfih.fr).

Data Collection

D-FIH

Collection Events

2010 - 2018

Mode of Collection

As far as the data entry is concerned, two technologies were employed: the IT-organized manual data entry on the one hand and, on the other, a semi-automatic process based on a specific software.

The IT organized data entry concerns at least the official lists from 1796 to 1950. This data entry has been outsourced to a specialized social firm. Various teams of operators have been specialized by type of data (i.e. cash prices, forward prices, dividends...), in order to ensure satisfactory productivity.

The semi-automatic data entry is based on specific software developed in cooperation with a service provider. The specific software combines OCR techniques and artificial intelligence to learn from its errors and insert automatically the data into the database. It is used to capture and enter into the database all the information collected from the yearbooks.

Action to Minimize Losses

In order to target an accuracy rate of 99.99%, it has been decided to adopt a "double data entry": the same data are manually entered by two operators; in case of differences, a third person check the data out.

Data Sources

Cours authentique (Paris)

Annuaire Desfossés

Annuaire des valeurs admises à la cote officielle

Publication date: 12/31/2018 12:00:00 AM

The database in managed by the Oracle system and organized according to the relational model. It consists of a set of interconnected tables. Each table corresponds to a storage unit. To date, the database contains nearly 150 tables (only the principal tables are documented here). The information is stored in lines (called tuples) and in columns, called attributes. Because the database stores long-term data, each piece of information is defined and valid within a given period of time, with a start date and an end date. A relationship between two tables is defined from a primary key, that is, from an attribute or a combination of attributes. Relationships between tables are not

all handled in the same way. In some cases, the primary key of one of the tables is simply added in the other. This key is then called a foreign key. In other cases, a join table is created with the two primary keys of the tables to be joined.

ENDDATE - Last day for which this connection between stock and issuer applies	
Туре	Date
Description	ALWAYS 31/12/3999 FOR THE LAST TUPPLE LINKED TO THIS IDENTIFIER

EX_COUPON - The day for which the coupon was detached from the stock or bond Type Date

This is not the payment day

Description

☑ COUPON - Coupon number (and additional information)	
Туре	Text
Description	If available; additional information can be for example "talon"

■ TYPE - Type of dividend or interest	
Туре	Numeric (Integer)
Description	Can be for example "first dividend", "second dividend"

■ DIVIDEND - Net dividend or interest	
Туре	Numeric (Integer)

© CURRENCY - The currency in which the interest or dividend was paid	
Туре	Numeric (Integer)
Description	The number of the currency refers to the table in which all currencies are stored

☑ YEAR1 - Accounting year for which the interest or dividend is paid		
Туре	Text	

■ YEAR2 - Accounting year for which the interest or dividend is paid

Type Text

■ SOURCE - Source where the information was found

Type Text

■ BRUTO_DIVIDEND - Gross dividend or interest

Type Numeric (Integer)

TAX - Amount of taxes paid

Туре	Numeric (Integer)
Description	Filled in when the amount appears on the official list.

■ TAX_TYPE - Identifier of the tax type

Туре	Text
Description	Might be 'tax on dividends', 'flat tax', etc.

■ ID - Identifier of a line of the table

Туре	Numeric (Integer)

■ ID - UNIQUE IDENTIFIER

Type Numeric (Integer)

■ NAME - Official name of the currency

Type

₫ COUNTRY - Name of the country to which this currency belongs

Type Text

■ ISO CODE - Iso code of the currency

Туре	Text
Description	Currency designator as provided by the International Organization of Standardization (ISO 4217)

■ STARTDATE - First day for which the currency exists

Type Date

■ ENDDATE - Last day for which the currency exists

Type Date

■ EXACTDATE - The day for which the exchange rate was found

Type Date

■ TYPE - Type of exchange rate		
Туре	Numeric (Integer)	
Description	Refers to the table 'KIND_OF_RATES'. Might be "discount"; "interest"; etc.	

■ NAME - ID of the name of the country / city		
Туре	Numeric (Integer)	
Description	Refers to the table 'EXCHANGE_NAME'. Might be for instance "Belgium"; "Geneva"; etc.	

■ MATURITY - ID of the maturity	
Туре	Numeric (Integer)
Description	Refers to the table 'MATURITY'

■ PRICETYPE - ID of the type of price	
Туре	Numeric (Integer)

■ RB - ID of the RB		
Туре	Numeric (Integer)	
Description	Three modalities: "(null)"; "R" (when the exchange rate is expressed as a 'report'); "B" (when the exchange rate is expressed as a "deport")	

■ NOTE - Used when the price is expressed in function of the par value

Туре	Text		
------	------	--	--

■ ETMOINS - Either 1 ("Et") or 2 ("Moins")		
Туре	Numeric (Integer)	
Description	2 is used when the exchange rate includes a substraction in percentage	

FOREIGN - Rate of foreign discount	
Туре	Numeric (Integer)

■ COMMENTS - Free comments	
Туре	Text

■ SCALE - Used when a unit is indicated	
Туре	Text
Description	For example : "in %"; "per month"

■ Price	
Туре	Numeric (Integer)

TYPE - The type of number or amount	
Туре	Numeric (Integer)
Description	Four modalities: issued, admitted to the stock exchange, existing, in circulation

Type Date

■ VALUE - Quantity	
Туре	Text
Description	Three possibilities: number of securities; amount (if capital); rentes. (see also the variable KIND).

■ CURRENCY - The currency in which the total amount issued is given	
Туре	Numeric (Integer)
Description	If a "value" is given

■ ENDDATE - The last day for which the amount or number holds	
Туре	Date
Description	This day is identical to the next day for which a new amount or number applies

■ QUANTITYFACTOR - Number needed to adjust the quantity	
Туре	Numeric (Integer)
Description	Useful when the quantity of securities is expressed as a fraction

₫ COUPURES - Either "Y" or "N"

Туре	Text
Description	It takes the value of "Y" if the value is expressed for a "coupure" (denomination)

■ KIND - ID of the kind of quantity		
Туре	Numeric (Integer)	
Description		

■ STARTDATE - The day for which this nominal value is registered	
Туре	Date

☑ VALUE - Nominal value or number of stocks or bonds	
Туре	Numeric (Integer)

CURRENCY - UNIQUE IDENTIFIER for a particular currency		
Туре	Numeric (Integer)	
Description	Connects this identifier to the currency identifier in the table "CURRENCY"	

FRACTION - This column tells whether the column "value" has a nominal value		
or not		
Туре	Code	
Description	Has to be y (yes) or n (no) YES means : there is no nominal value, the value of every stock is a fraction of the total amount of stocks. No means: There is a nominal value	

ENDDATE - The last day for which this nominal value is registered		
Туре	Date	
Description	This day is identical to the next day for which a new nominal value applies	

UALUES_TEXT - If more than one nominal value is registered in the official price lists	
Туре	Text
Description	This is often the case for government bonds with different coupures (for example 5000-2000) as registered in the official price lists

■ CORPORATION - UNIQUE IDENTIFIER		
Туре	Numeric (Integer)	
Description	Connects this corporation to the corporation in corporation_name table	

■ OPERATION_DATE - Precise date of the operation		
Туре	Date	

■ OPERATION_TYPE - Type of operation	
Туре	Numeric (Integer)
Description	Refers to the table "OPERATION_TYPES". For instance: 1 (split), 2 (reverse split), 13 (reduction of capital by reimbursement of stocks)

■ ADJUSTMENT_FACTOR - Factor of adjustment computed by hand for every operation

уре	Numeric (Integer)	
-----	-------------------	--

ADJUSTMENT_CONSTANT - Constant of adjustment computed by hand for every operation

Туре	Numeric (Integer)	
------	-------------------	--

Type Numeric (Integer) Description For example: 5 (ISIN code) , 11 (Eurhisfirm code)

■ STARTDATE - The first day for which this code is registered	
Туре	Date

Туре	Numeric (Integer)

■ ID - UNIQUE IDENTIFIER for a particular person	
Туре	Numeric (Integer)

■ NAME - Name of the person	
Туре	Text

STARTDATE - Birth day

Туре	Date

■ ENDDATE - Date of death	
Туре	Date

₫ GESLACHT - Mar	n (M) or Woman (V)
Туре	Code

■ FIRSTNAME - First name	
Туре	Text
Description	Used when the first name is cleary indicated on the source

ID - Unique identifier for the link between a particular security and the owner for a particular point in time

Type Numeric (Integer)

■ PERSON - UNIQUE IDENTIFIER for a particular person	
Туре	Numeric (Integer)
Description	Connects this identifier to the person identifier, called "ID" in the table PERSON

☐ PERCENTAGE - The percentage of this particular security in the possession of this person or corporation

Туре	Numeric (Integer)	
------	-------------------	--

AMOUNT - The amount of this particular security in the possession of this person or corporation

	Numeric (Integer)	Туре
--	-------------------	------

NUMOFSTOCKS - The number of stocks or bonds of this particular security in the possession of this person or corporation

		Numeric (Integer)	Туре
--	--	-------------------	------

ID - Unique identifier for the period for which a stock or bond was listed in a sub-sector of the stockexchange

Numeric (Integer)	
-------------------	--

■ SECTOR - Sub-sector of the stockexchange

Туре	Numeric (Integer)
------	-------------------

■ OLD_STOCK_ID - Former identifier of the stock	
Туре	Numeric (Integer)
Description	Used after a merger of stocks. This ID is the former ID of the stock; the new one is in Stock

■ STOCKEXCHANGE_ID - Identifier of the relevant stock exchange

Type Numeric (Integer)

NOTATION - Unique identifier for the period for which a stock or bond was

listed in a sub-sector of the stockexchange

Туре	Numeric (Integer)
Description	Connects this identifier to the stock_name identifier, called "STOCK"

■ DAY - The day of trading

Type Date

₫ ARGENT - Bid price

Type Numeric (Integer)

1 PAPIER - Ask price

Type Numeric (Integer)

■ OPEN - Opening price

Type Numeric (Integer)

₫ CLOSE - Closing price

EUROFIDAI Stocks Daily database

Abstract

The EUROFIDAI Stocks Europe database contains daily share prices of almost 85,000 common or ordinary shares listed on 214 stock exchanges in 37 European countries (Austria, Belgium, Bosnia, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Macedonia, Malta, Netherlands, Norway, Poland, Portugal, Romania, Russia, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, United Kingdom and Ukraine), and share related data such as market capitalisation, trading volumes and dividend payments. It also includes limited information on issuers such as legal form, domicile and industry codes. The historical data are going back to 1977 for France, and to 1980 for other countries.

Other EUROFIDAI databases, not covered by the EURHISFIRM Data Documentaion, cover indices, mutual funds, exchange rates and corporate events.

Variable Count

■ EUROFIDAI_CODE	
Туре	Numeric (Integer)
Description	Unique permanent identifier assigned by EUROFIDAI to each security

d Quotation_date	
Туре	Date

Description	Trading date

■ DAY_OF_WEEK	
Туре	Text
Description	Explicit designation for the calendar day

■ STOCK_EXCHANGE_CLOSE	
Туре	Text
Description	Explicit designation for the trading status of a stock exchange, which takes a value of 1 if the stock exchange close and 0 otherwise

₫ DAILY_RETURN	
Туре	Numeric (Integer)
Description	Daily holding return adjusted for capital changes and dividend distributions

■ DAILY_RETURN_REMARK	
Туре	Code
Description	Indicates if the adjusted daily holding return has to be used with precaution

daily_return_	_REMARK_NAME
Туре	Text
Description	Explicit explanation of the reason for which the adjusted daily holding return has to be used with precaution

■ OPENING_PRICE	
Туре	Numeric (Integer)
Description	Opening price

■ WEIGHTED_MEAN_PRICE	
Туре	Numeric (Integer)
Description	Weighted average price

■ LOWEST_PRICE	
Туре	Numeric (Integer)
Description	Lowest price

HIGHEST_PRICE	
Туре	Numeric (Integer)
Description	Highest price

CLOSING_PRICE	
Туре	Numeric (Integer)
Description	Closing price

₫ ESTIMATED_PRI	CE
Туре	Numeric (Integer)

Description	Stock price which, according to the various situations, can be defined in a different
	way

■ ESTIMATED_PRICE_INDIC	
Туре	Code
Description	Code associated with the choice made for the estimated price

■ ESTIMATED_PRICE_INDIC_NAME	
Туре	Text
Description	Explicit explanation of the choice made for the estimated price

₫ ASK	
Туре	Numeric (Integer)
Description	Closing ask price

€ BID	
Туре	Numeric (Integer)
Description	Closing bid price

SHARES_NUMBER	
Туре	Numeric (Integer)
Description	Total number of shares available, used to calculate the market capitalization of the firm by multiplying the number of shares by the (unadjusted) price.

TRADING_VOLUME_SHARES	
Туре	Numeric (Integer)
Description	Transaction volume (number of shares traded), not adjusted for corporate events

TRADING_VOLUME_VALUE	
Туре	Numeric (Integer)
Description	Transaction volume (value of shares traded), expressed in the same currency than the closing price

E CAPITALIZATION	
Туре	Numeric (Integer)
Description	Market capitalization

□ CAPITALIZATION_OBS	
Туре	Code
Description	Indicates if the market capitalization has to be used with precaution

■ CAPITALIZATION_OBS_NAME	
Туре	Text
Description	Explicit explanation of the reason for which the market capitalization has to be used with precaution

₫ ADJUST_COEF	
Туре	Numeric (Integer)
Description	Adjustment coefficient for corporate events that have an impact on the stock price, used to calculate adjusted prices for operations on capital

■ NET_DIVIDEND	
Туре	Numeric (Integer)
Description	Dividend distributed, expressed in the quoted price currency

GROSS_DIVIDEND	
Туре	Numeric (Integer)
Description	Gross dividend, distributed dividend plus tax credit

■ QUOTED_PRICE_CURRENCY_ISO	
Туре	Text
Description	ISO 4217 code of the stock quoted price's currency

dividend_currency_iso	
Туре	Text
Description	ISO 4217 code of the dividend's currency

■ ADJUST_SUPER_COEF	
Туре	Numeric (Integer)

Description	Adjustment coefficient for dividend distribution	
-------------	--	--

■ MONTHLY_RETURN	
Туре	Numeric (Integer)
Description	Monthly return obtained by compounding daily holding returns for a security.

■ LAST_MONTHLY_DATE	
Туре	Date
Description	Date of the last available trading day for the security.

■ BEGDATE_EUROFIDAI_CODE	
Туре	Date
Description	First date at which the EUROFIDAI code is available

■ ENDDATE_EUROFIDAI_CODE	
Туре	Date
Description	Last date for which information is available for the corresponding EUROFIDAI code

■ SECURITY_NAME	
Туре	Text
Description	Name of the security

■ VALOREN_CODE	
Туре	Numeric (Integer)
Description	VALOREN code of the security

■ VALOREN_CODE_EXPIRATION_DATE	
Туре	Date
Description	Date at which the VALOREN code expired

■ VALOREN_CODE_EXPIRATION_REASON	
Туре	Code
Description	Reason for which the VALOREN code expired

■ VALOREN_CODE_EXPIRATION_REASON_NAME	
Туре	Text
Description	Explicit explanation of the reason for which the VALOREN code expired.

■ ISSUER_CODE	
Туре	Numeric (Integer)
Description	Code of the security issuer

■ ISSUER_NAME	
Туре	Text

Description Name of the security issuer

■ ISSUER_WEBSITE	
Туре	Text
Description	Issuer's website

ISSUER_LEGAL_FORM	
Туре	Code
Description	Legal form of the security issuer (expressed as a code)

■ ISSUER_LEGAL_FORM_NAME	
Туре	Text
Description	Explicit designation for the legal form of the security issuer

■ ISSUER_DOMICILE	
Туре	Text
Description	Name of the issuer's domicile, attributed by TELEKURS

■ ISSUER_EXPIRATION_DATE	
Туре	Date
Description	Date at which the issuer expired

ISSUER_EXPIRATION_REASON_NAME	
Туре	Text
Description	Explicit explanation of the reason for which the security issuer expired

■ EUROFIDAI_SECTOR_CODE	
Туре	Code
Description	Code of the issuer's sector, provided by EUROFIDAI

■ EUROFIDAI_SECTOR_NAME	
Туре	Text
Description	Name of the issuer's sector, provided by EUROFIDAI

■ SIC_SECTOR_CODE	
Туре	Numeric (Integer)
Description	The Standard Industrial Classification (SIC) code

■ SIC_SECTOR_NAME	
Туре	Text
Description	Explicit designation for the sector SIC code

■ SECURITY_STATUS	
Туре	Code

Description	Status of the security (expressed as a code)
-------------	--

■ SECURITY_STATUS_NAME	
Туре	Text
Description	Explicit designation for the status of the security

€ STOCK_TYPE	
Туре	Code
Description	Code for the type of stock

■ STOCK_TYPE_NAME	
Туре	Text
Description	Explicit designation for the type of stock

ISIN_CODE	
Туре	Text
Description	ISIN code of the security (note that some ISIN codes are copyrighted, particularly those with the prefix "AN", "BM", "BS", "CA", "KY "US" or "VG")

■ BEGDATEAV_ISIN_CODE	
Туре	Date
Description	First date at which the ISIN code is valid

■ ENDDATEAV_ISIN_CODE	
Туре	Date
Description	Last date at which the ISIN code is valid

ISIN_CODE_STATUS	
Туре	Code
Description	Code for the status of the ISIN code

ISIN_CODE_STATUS_NAME	
Туре	Text
Description	Explicit designation for the status of the ISIN code

■ ORIG_ISSUER_CODE	
Туре	Numeric (Integer)
Description	Code of the original issuer

■ ORIG_ISSUER_NAME	
Туре	Text
Description	Name of the original issuer

■ ORIG_ISSUER_DOMICILE		
Туре	Text	

Description	Domicile of the original issuer

■ STOCK_EXCHANGE	
Туре	Code
Description	Code of the stock exchange

■ STOCK_EXCHANGE_NAME	
Туре	Text
Description	Name of the stock exchange

■ STOCK_EXCHANGE_TYPE	
Туре	Code
Description	Type of the stock exchange (expressed as a code)

■ STOCK_EXCHANGE_TYPE_NAME	
Туре	Text
Description	Explicit designation for the type of the stock exchange

■ STOCK_EXCHANGE_COUNTRY_NAME	
Туре	Text
Description	Country of the stock exchange

■ MAIN_INSTRUMENT	
Туре	Numeric (Integer)
Description	Valoren code of the main instrument a temporary instrument is attached to

■ MAIN_INSTRUMENT_NAME	
Туре	Text
Description	Name of the main instrument a temporary instrument is attached to

dependency_type_code	
Туре	Code
Description	Code describing how a temporary instrument depends on the main instrument

dependency_type_description	
Туре	Text
Description	Description of how a temporary instrument depends on the main instrument

■ ASSIMILATION_DATE	
Туре	Date
Description	Official expiry date of a temporary instrument

☐ PRINCIPAL_ TRADING_LINE	
Туре	Numeric (Integer)

Description	EUROFIDAI code of the principal trading line

■ NUMBER_OBSERVATIONS	
Туре	Numeric (Integer)
Description	Number of available observations for the security

Historische Geld- und Kapitalmarktdatenbank, Deutschland 1871 bis 1914

Abstract

This dataset contains end-of-month prices of ordinary shares (Stammaktien) of German companies listed on the stock exchanges of Berlin, Frankfurt, Hamburg, Leipzig, Köln and München, in addition to the total amount of the share capital and the annual amount of dividends paid. The dataset consists of 6 Excel-files (one per exchange) with 13 tabs each (one tab per industry, i.e.), in addition to a PDF-file (Anmerkungen.pdf) with the full name of the company (company names are abbreviated in the Excel-files) and additional information on capital changes, name changes and mergers. It also includes an MS Word-file with a short description of the data and a lenght PDF-file with a detailed more detailed description of the database.

London Share Price Database

Abstract

The London Share Price Database (LSPD) Source File contains monthly share prices of more than 10,000 common or ordinary shares listed on the London Stock Exchange (LSE) going back to 1955, and share related data such as share capital, capital changes and dividend payments. It also contains a historical record of all changes in names and Stock Exchange Daily Official List (SEDOL) codes. From 1955–1974, it comprises a large, representative sample of all companies and IPOs. 33 percent of all companies listed in 1955 were selected randomly. For each subsequent year until 1974, a random selection of 33 percent of the newly listed companies was added to the sample. From 1975, the LSDP covers all UK equities, including junior market stocks quoted on the Unlisted Securities Market (USM, 1980-1996) and the Alternative Investment Market (AIM, from 1995). A Master Index Files contains the names and SEDOL numbers (amongst others) of all UK companies quoted on the LSE since 1955.

In addition to the Source file, LDSP also contains Returns and Archive Files with derived data. The later are not covered by the EURHISFIRM Data Documentation, but are described in detail in the LSDP Manual.

© G1 - Company Number	
Туре	Numeric (Integer)
Description	A unique identification number, allocated by us in a sequence from 1, for all British registered companies quoted on the London Stock Exchange since 1955. This number was allocated to overcome the problem of changing (and sometimes re-used) SEDOL numbers.

■ G2 - Number of Capital Changes	
Туре	Numeric (Integer)
Description	Number of records (type-2) in the Capital Changes section.

₫ G3 - Number of Dividends	
Туре	Numeric (Integer)
Description	Number of records (type-3) in the Dividends section.

■ G4 - Number of Units	
Туре	Numeric (Integer)
Description	Number of records (type-4) in the Units section.

■ G5 - Number of Years for Prices, Share Capital, Earnings	
Туре	Numeric (Integer)
Description	Number of records in the Prices, Share Capital and Earnings sections i.e. the number of calendar years for which this data is recorded. There may be some missing data during this period due to suspensions.

■ G6 - First Year of Data	
Туре	Year
Description	First calendar year for which data is recorded (format YYYY).

₫ G7 - Date First Entered Database	
Туре	Numeric (Integer)
Description	The month number when the company's ordinary share was first included in the database, where January 1900=1 (e.g. Jan 1955 = 661 and Dec 2013 = 1368).

■ G8 - Type of Birth	
Туре	Code
Description	This information is regularly collected from Extel cards or the Capital Gains Tax Book (C.G.T. book). An indication of the reason why the security first came into the database and/or was first quoted in SEDOL.

🔁 G9 - Date Last Quoted	
Туре	Numeric (Integer)
Description	The month number when the security was last quoted in SEDOL, where January 1900 = 1 (e.g. December 1984 = 1020). If the security is currently quoted at the end of the period covered by the database then the month number = 2000. IMPORTANT see also G12

■ G10 - Type of Death	
Туре	Code
Description	An indication of the reason why the security ceased to be quoted in the SEDOL.

■ G11 - Acquiring Company Number	
Туре	Numeric (Integer)

Description	If item G10 (type of death) is set to 5 or 6 then the company number (see G1) of the
	acquiring company is given. If the acquiring company is not currently included in the
	database as a live company, then this number will be negative. There are two special
	cases: -1 indicates that the company was taken over by a foreign company or a
	company not in the database, e.g. by a private company or a management buyout; –2
	indicates that the company has been nationalised.

雪 G12 - Death Event Date	
Туре	Numeric (Integer)
Description	The month number, where January $1900 = 1$, in which the death event indicated by G10 occurred. In the case of an acquisition (G10 = 5), this date may be significantly before the date last quoted (G9), if a sufficient number of shares were not acquired for there still to be a market for them. In the case of a liquidation (G10 = 7), this date may be much later than the date last quoted, as a company's listing may be suspended for a considerable time before the company goes into liquidation. In the case of a suspension (G10 = 10), this date will be the month number when the security was last quoted in SEDOL. Item G9 will remain set to 2000, to indicate that although the security is not currently quoted in SEDOL, it is still a live company.

■ G13 - Sample and Index Constituent Indicators	
Туре	Numeric (Integer)

Description

An indication of whether this company is a member of one of the seven historic samples (RND, L55, L72, A75, L76, T76 or BRW) or is an index constituent at the date of the file (eg YYYYMM 201812). This is a binary field where:

1 (Bit 1) = RND: Sample (random) consisting of 33% of companies quoted in January 1955 together with 33% of companies granted quotations in each successive year until start 1975 when LSPD became fully comprehensive

2 (Bit 2) = L55: Sample of 500 largest companies in 1955

4 (Bit 3) = L72: Sample of 200 largest companies in 1972

8 (Bit 4) = 250: FTSE-250 Index Companies

16 (Bit 5) = A75: Sample of all companies quoted in January 1975 when LSPD became fully comprehensive

32 (Bit 6) = L76: Sample of 1000 largest companies in 1976

64 (Bit 7) = T76: Sample of quoted companies from "Times Top 1000" 1976 – data for companies entering LSPD by virtue of being only in this sample begins from start 1971

128 (Bit 8) = FTA: FTSE All Share Index Company(see also G18)

256 (Bit 9) = SEC: Secondary shares

512 (Bit 10) = IR: Irish companies quoted in SEDOL from Jan 1978

1024 (Bit 11) = FTO: FTO 30 Index Companies 2048 (Bit 12) = ODD: Odd foreign shares

4096 (Bit 13) = USM: Unlisted Securities Market 8192 (Bit 14) = 100: FTSE 100 Index Companies

16384 (Bit 15) = SFM: Specialist Funds Market from 2007; previously Third Market

companies prior to 2000

32768 (Bit 16) = OTC: O.T.C. companies

65536 (Bit 17) = SPL: Split Trusts

131072 (Bit 18) = BRW: Sample of Brewery Industry from 1955-1974

262144 (Bit 19) = NUM: Numis Smaller Companies Index

524288 (Bit 20) = FLG: FTSE-Fledgling

1048576 (Bit 21) = AIM: Alternative Investment Market

2097152 (Bit 22) = OFX: OFEX

Note: A company may be in more than one sample or index, e.g. a company in the Random sample and an FTSE All Share Index constituent would have a value of 129.

To test if a company is a FTSE All Share constituent, the following FORTRAN statement may be used: IF (MOD(G13/128,2).EQ.1)

The equivalent test in Excel would be = IF (MOD(INT(G13/128),2)=1,1,0)

₫ G15 - Latest SEDOL Number

Туре	Text
Description	The current or last SEDOL number of the company as at the date of the file where the final digit is a check digit (for recent data).

■ G16 - SEDOL Group		
	Туре	Code
	Description	The SEDOL group for current companies.

■ G17 - Stock Exchange Industrial Classification	
Туре	Code
Description	The current or last industrial classification as previously recorded in the Stock Exchange Daily Official List or in the back of the Stock Exchange Year Book.

🖪 G18 - Financial Times Actuaries Index Marker	
Туре	Code
Description	An additional marker for all companies included in the FTA (subsequently FTSEA) Classified Indices. Negative number means company also included in FT30 index.

■ G26 - Primary/Secondary Share Pointer	
Туре	Numeric (Integer)
Description	Where a company has more than one ordinary share, this pointer will give the COMPANY number of the corresponding other share.

₫ G28 - Birth Date

Туре	Date
Description	When the type of birth is available (G8) the birth date (format YYYYMMDD) gives the first date the security was offered for sale or for tender, introduced to the Stock Exchange, placed, issued, acquired in the case of a merger, or first quoted.

■ G29 - Issue Price	
Туре	Numeric (Integer)
Description	When the type of birth (G8) and the birth date (G28) are available, the issue price quotes the first price at which the security was offered, when available.

■ G31 - S E Company Issuer Code	
Туре	Text
Description	A unique code allocated to each company, based on codes used by the Stock Exchange containing six alphabetic characters. A seventh character has been added to all codes to provide a check sum against input errors. This code can be used to sort companies by alphabetical order. The Issuer Code may be used as a cross-reference to Extel's EXSTAT and MicroEXSTAT Company accounts databases.

■ G53 - Actual Number of Name Records	
Туре	Numeric (Integer)
Description	Actual number of name records for this company.

■ G54 - Current Number of Shares	
Туре	Numeric (Integer)
Numeric Details	Scale: 1000
Description	Number of shares in snapshot month (live companies only) in thousands.

₫ G55 - Current Net Dividend	
Туре	Numeric (Integer)
Description	Forecast Net dividend yield in snapshot month (live companies only) as per EXSHARE forecast rules, held in the form of a percentage multiplied by 100. The archive records hold a time series of dividend per share.

₫ G56 - Current Earnings	
Туре	Numeric (Integer)
Description	Net (actual) earnings in snapshot month (live companies only), held in the form of pence per share multiplied by 100.

■ G57 - Current Normal Market Size	
Туре	Numeric (Integer)
Description	Normal market size in snapshot month (live companies only), held as the value divided by 100.

₫ G59 - Current Status Marker	
umeric (Integer)	
ratus marker at date of file (live companies only), held as SEAQ Class*10 + Trustee ratus; where: Trustee status marker = 1 for narrow, = 2 for wide.SEAQ Class: Alpha Beta Gamma	
uı :a :a B	

Alternate Title: C records (Capital Changes)

The Capital Changes section has event-driven observations. These records are stored in chronologically sequenced lists.

Variable Count

₫ G1 - Company Number	
Туре	Numeric (Integer)
Description	A unique identification number, allocated by us in a sequence from 1, for all British registered companies quoted on the London Stock Exchange since 1955. This number was allocated to overcome the problem of changing (and sometimes re-used) SEDOL numbers.

₫ C2 - Adjustment Factor	
Туре	Numeric (Integer)

Description	Factor by which old share prices must be adjusted to allow for capital changes.
	Format = true factor * 1000 (e.g. scrip issue of 1 for 2: adjustment factor = $.667$ * $1000 = 667$).
	If the factor = 0, then the adjustment factor has not been calculated.
	These factors are not recorded cumulatively. To calculate adjusted price series they must be multiplied together.
	If there are two capital changes on the same day then the factors should be multiplied together.
	Note: In calculating the adjustment factor the fundamental principle is that the value of the company after the capital change is the same as that before. Whenever the ordinary shareholder is given something other than ordinary shares the problem is rather more complex. There are two stages to working out the factor. Firstly, the value of "the something" must be found and secondly, this value must be exchanged back into ordinary shares. At least two prices are necessary, the ex-price of "the something" and the cum-price of the ordinary share.

■ C3 - Type of Capital Change	
Туре	Code
Description	Indication of the type of capital change

€ C4 - Share Type	
Туре	Code
Description	Other type of share involved in a capital change where C3 = 2, 7, 8, 15 or 16

₫ C5 - Status flag	
Туре	Code

₫ C7 - Variable – 1 New Shares/Amount	
Туре	Numeric (Integer)
Description	Dependent on the type of capital change (C3).
	NEW SHARES Number of new shares issued by way of script or rights issue in relation to a specified holding of existing shares (see C8).
	AMOUNT Value in £ of shares offered in complex rights issue.

■ C8 - Variable – 2 Old Share	
Туре	Numeric (Integer)
Description	OLD SHARES Number of old shares needed to qualify for new shares issued (C7).
	e.g. scrip issue 1 for 2, old shares = 2, new shares = 1

₫ C9 - Variable – 3 Old Par Value/Ex Price Ord	
Туре	Numeric (Integer)
Description	Dependent on type of capital change (C3). OLD PAR VALUE Par (nominal) value of the share, before the capital change, in new pence.
	EX-PRICE Ex-price of ordinary share involved in capital changes.

₫ C10 - Variable – 4 New Par Value/Premium/Ex-price Other	
Туре	Numeric (Integer)

Description	Dependent on type of capital change (C3).
	NEW PAR VALUE Par (nominal) value of the share, after capital change, in new pence.
	PREMIUM Premium offered on new shares in complex rights issue, recorded in tenths of a pence/£ unit.
	e.g. 7.5p on a £1 unit = 75.
	EX-PRICE OTHER Ex-price of the other share involved in the issue.

d C11 - Variable − 5 Par Value New Shares/Issue Price/Cap.Rep/Am't Canc	
Туре	Numeric (Integer)
Description	Dependent on capital change type (C3).
	P V NEW SHARES Par value of new shares issued (see C7)
	ISSUE PRICE Issue price of new shares in a rights issue
	CAP REP Amount of capital repayment in new pence
	AM'T CANC Amount cancelled in new pence

₫ C12 - Variable – 6 Par Value Old Shares/Cum Price	
Туре	Numeric (Integer)
Description	Dependent on capital change type (C3). P V OLD SHARES Par value of old shares held (see C8)
	CUM PRICE Cum price of share in new pence on the day before the ex-date of a rights issue

C13 - Announcement Date

Туре	Date
Description	Date (YYYYMMDD) that this capital change was announced (when known).

Alternate Title: D records (Dividends)

The Dividends section has event-driven observations. These records are stored in chronologically sequenced lists.

Variable Count

₫ G1 - Company Number	
Туре	Numeric (Integer)
Description	A unique identification number, allocated by us in a sequence from 1, for all British registered companies quoted on the London Stock Exchange since 1955. This number was allocated to overcome the problem of changing (and sometimes re-used) SEDOL numbers.

■ D1 - Ex Dividend Date	
Туре	Date
Description	Date (YYYYMMDD) when share went "XD".

■ D2 - Pay Date	
Туре	Date
Description	Date (YYYYMMDD) dividend paid.

₫ D3 - Net Dividend	
Туре	Numeric (Integer)
Measurement Unit	Pence
Numeric Details	Scale: 100
Description	Net Dividend per share in hundredths of pence.

■ D4 - Tax Credit	
Туре	Numeric (Integer)
Measurement Unit	Pence
Numeric Details	Scale: 100
Description	Tax credit per share in hundredths of pence or, 0 if the dividend is not liable for tax. Thus, the gross dividend is the sum of items D3 and the absolute value of D4.

■ D5 - Special Marker	
Туре	Code
Description	Marker to indicate the status of the dividend

■ D6 - Year of Dividend	
Туре	Year
Description	Financial year (YYYY) on which dividend is paid.

■ D7 - Type of Divi	idend
Туре	Code

Description	Marker (NN) to indicate the type of dividend. Some digits can be combined (e.g. NN =
	95 = Final and Bonus). The codelist includes possible single values of N.

■ D8 - Conversion Rate	
Туре	Numeric (Integer)
Description	Conversion rate for non-sterling dividends. Note: Nothing useful now held in this field.

🔁 D9 - Announcement Date	
Туре	Date
Description	Date (YYYYMMDD) that this dividend was announced (or declared). The date will be set to zero if the information is either not available or prior to February 1965. From February 1965 to 1977 this date is the declaration date shown in Moodies (now Stubbs) Taxation Service. Recent dates are these as reported by EXSHARE.

Alternate Title: U records (Units)

The Units section has event-driven observations. These records are stored in chronologically sequenced lists.

Variable Count

₫ G1 - Company N	umber
Туре	Numeric (Integer)

Description	A unique identification number, allocated by us in a sequence from 1, for all British
	registered companies quoted on the London Stock Exchange since 1955. This number
	was allocated to overcome the problem of changing (and sometimes re-used) SEDOL
	numbers.

■ U1 - Date of Change	
Туре	Date
Description	Date (YYYYMMDD) that the share changed to this par value. In cases where the precise day in the month is not known, we have chosen the 15th.

■ U2 - Currency of Par Value	
Туре	Code
Description	Currency of par value, represented by the current ISO 4217 currency code

₫ U3 - New Par Value	
Туре	Numeric (Integer)
Measurement Unit	Currency (see U2)
Description	Par value of the share in local units (including 2 decimal places), where shares with no par value have the value zero. In the past, the value zero could indicate a foreign share or a par value below 1 (before we introduced decimal places).
	Note: If there is a change in the type of share but not the nominal value, then a new par value record will record the new share type with the unchanged par value.

₿ IspmP

Alternate Title: P records (Prices)

Price observations are collected monthly and there will be a record for each month the security has been on the database. Prices in old pence were decimalised with some subsequent loss of accuracy. As a major proportion of prices were either whole shillings or multiples of 3d the following conversion was used:

1d = 0p

2-3d = 1p

4-5d = 2p

6-8d = 3p

9-10d = 4p

11-12d = 5p

Variable Count

₫ G1 - Company Number	
Туре	Numeric (Integer)
Description	A unique identification number, allocated by us in a sequence from 1, for all British registered companies quoted on the London Stock Exchange since 1955. This number was allocated to overcome the problem of changing (and sometimes re-used) SEDOL numbers.

■ P1 - End of Month Date	
Туре	Date
Description	Date (YYYYMMDD) of the last trading day in the month. This is the day on which prices are recorded for each month.

■ P2 - Low Quote/Mid-SEDOL Price	
Туре	Numeric (Integer)
Measurement Unit	New pence

Description	Pre-1978: The price in new pence indicating the low end of the official quoted range is given in SEDOL. No quote given if share is suspended. This price is also used in the calculation of market capitalisation.
	Post 1978: The price represents a mid-SEDOL quote.

■ P3 - High Quote/Closing Prices	
Туре	Numeric (Integer)
Measurement Unit	New pence
Description	Pre-1978: The price in new pence indicating the high end of the official quoted range as given in SEDOL. No quote given if share is suspended.
	1978-6/81: The price is the closing jobbers' price as given in the Financial Times, or 0 if not given in the FT.
	7/81-now: The price is the closing price taken from EPIC (Exchange Price Information Computer, set up by Extel and the Stock Exchange), or 0 if not available from EPIC.

₫ P4 - Transaction Price	
Туре	Numeric (Integer)
Measurement Unit	New pence
Description	The price in new pence representing the last marked price in the month.
	In March 1981, when the format of the SEDOL was altered, the sequence of marked prices ceased to be given in chronological order. Since that time a price has been selected at random from all the marked prices, without any special markers, given for the last trading day of the month.
	If no price meets these criteria then the price after 2:15 the previous day is taken or, failing this, a price at some earlier date. Wherever possible, prices with special markers are avoided.
	In October 1986, the format of the SEDOL was altered back to a chronological order. Since then, we have been taking the last price of the day, avoiding special markers if possible.

■ P5 - Transaction Date	
Туре	Date
Description	Date (YYYYMMDD) of the transaction.

■ P6 - Low Quote Price Marker	
Туре	Code
Description	Age of P2 price

■ P7 - High Quote Price Marker	
Туре	Code
Description	Age of P3 price

■ P8 - Price Status	
Туре	Code
Description	Indicates the status of this price record.

Alternate Title: S records (Share Capital)

Share Capital observations are annual and there will be a record for each observation, starting at the base year (G6) and continuing for the number of years (G5).

Variable Count

3

₫ G1 - Company Number	
Туре	Numeric (Integer)
Description	A unique identification number, allocated by us in a sequence from 1, for all British registered companies quoted on the London Stock Exchange since 1955. This number was allocated to overcome the problem of changing (and sometimes re-used) SEDOL numbers.

■ S1 - Date	
Туре	Date
Description	Date (YYYYMMDD) to which share capital data refers.

■ S2 - Issued Share Capital for end December Each Year	
Туре	Numeric (Integer)
Numeric Details	Scale: 1000
Description	The number (in thousands) of ordinary shares in issue at the end of the year (31 December). This data was originally collected from the "List of Quoted Securities" published monthly by Frederick Mathieson. Certain small companies were not included and, consequently, no share capital could be recorded. Missing data is indicated by a value of -1.

₿ IspmN

The N records contain a historical record of all changes in names and Stock Exchange Daily Official List (SEDOL) codes. Observations are event-driven and records are stored in chronologically sequenced lists.

How to Read a Names Record

I've chosen the names records for LSPD company 1598 to explain how to read them – there are no SEDOL number changes but everything else including suspensions.

G1,N1,N2,N3,N4,N5,N6,N7,N8,N9

1598,19700115,19851115,"0268303",32,52,"0000000",1,"0268303"," Diamond Stylus Co." 1598,19851115,19891015,"0268303",32,1,"0268303",1,"0268303","DSC Holdings" 1598,19891015,19900915,"0268303",97,1,"0268303",2,"0268303","Mid-States plc" 1598,19900915,19950415,"0268303",98,2,"0268303",2,"0268303","Mid-States plc" 1598,19950415,20060815,"0268303",32,2,"0268303",10,"0268303","Mid-States plc" 1598,20061015,20081215,"0268303",95,32,"0268303",10,"0268303","Mid-States plc" 1598,20090515,20111115,"0268303",95,30,"0268303",1,"0268303","Mid-States plc" 1598,20111116,20121115,"0268303",95,1,"0268303",10,"0268303","Aerte Group plc" 1598,20121126,20121126,"0268303",95,35,"0268303",20,"0000000","Aerte Group plc"

The first names record starts during January 1970 (the YYMM15 format indicates that this is accurate to the month only) and N5=52 is the birth marker for "data collected prior to company entering database".

During November 1985 there was a name change from Diamond Stylus Co to DSC Hldgs as you can see by N7=1 in the first record (and N5=1 in the second record).

During October 1989 there was both a change of name from DSC Hldgs to Mid-States PLC and a contemporaneous change of SEDOL Group from 32 to 97 – there is no specific code for this combination so we use N7=1.

During September 1990 there was another change of SEDOL Group from 97 to 98, as indicated by N7=2.

During April 1995, there was another change of SEDOL Group from 98 to 32.

During August 2006, the quotation was suspended, as indicated by N7=10.

During October 2006, we have N5=32 indicating a relisting after suspension and SEDOL Group change (from 32 to 95).

During December 2008, the quotation was again suspended.

During May 2009, we have N5=30 indicating a relisting after suspension.

On 16th November 2011 there is a change of name from Mid-States plc to Aerte Group plc.

Went into administration (N7=20) on 26th November 2012.

When shares are suspended, there may be short time gaps between the N2 date on one names record and the N1 date on the next names record.

Variable Count

© G1 - Company Number	
Туре	Numeric (Integer)
Description	A unique identification number, allocated by us in a sequence from 1, for all British registered companies quoted on the London Stock Exchange since 1955. This number was allocated to overcome the problem of changing (and sometimes re-used) SEDOL numbers.

■ N1 - Start Date	
Туре	Date
Description	The first month (YYYYMM15) for which the record is valid (e.g. the month a SEDOL number is first allocated or the month in which a company changes its name).

■ N2 - Finish Date	
Туре	Date
Description	The last month (YYYYMMDD) for which the record is valid e.g. the month a SEDOL number changes or the month a company loses its quotation. This should be the same as the date in item G9. Will be 20291215 for all live companies.

■ N3 - SEDOL Number	
Туре	Text
Description	SEDOL number (see G15).

■ N4 - SEDOL Group	
Туре	Code
Description	The SEDOL group in which the company is classified (see G16).

■ N5 - Reason for New SEDOL	
Туре	Code
Description	This marker gives an indication of the reason this record was created e.g. allocation of new SEDOL number or a change of name. When looking at the first Names record for a company, this item will contain one of the birth markers listed in item G8.

■ N6 - Previous SEDOL Number	
Туре	Text
Description	The SEDOL number of the security before the Start date of this record. This field will be set to zero in the first Names record of a company.

■ N7 - Reasons for New Name Record	
Туре	Code
Description	This item gives an indication of the reason for this record being superseded by another or for the death of the company. In the last name record, for live companies this item will have the value 0 while for dead companies this item will take one of the markers listed in G10.

■ N8 - Succeeding SEDOL Number	
Туре	Text
Description	SEDOL number of the succeeding share or company e.g. when a takeover has occurred, the SEDOL number of the acquiring company will be given. If the acquiring company in not currently included in the database as a live company, then this number will be negative. There are two special cases:
	"-1" indicates that the company was taken over by a foreign company or a company not in the database. "-2" indicates that the company has been nationalised.

■ N9 - Company Name	
Туре	Text
Description	Name of the company for the period between the Start and Finish dates.

The Master Index is a comprehensive index of the names of all UK companies quoted on the London Stock Exchange since 1955.

Variable Count

■ M1 - SEDOL Number	
Туре	Text
Description	Stock Exchange code number (including check digit). See G15.

■ M2 - Birth Date	
Туре	Date
Description	First month (YYYYMM15) on which the SEDOL number applied. If quoted in January 1955 then the Birth month = 19550115.

■ M3 - Death Date	
Туре	Date
Description	Last month (YYYYMM15) that this SEDOL number applied. If record is current then the Death month = 20291215.

■ M4 - SEDOL Group	
Туре	Code
Description	See G16.

■ M5 - Company Name	
Туре	Text
Description	Full name of the company.

■ M6 - Company Number	
Туре	Numeric (Integer)
Description	See G1.

■ M7 - Sample Marker	
Туре	Numeric (Integer)
Description	See G13.

■ M8 - Reason for Birth	
Туре	Code
Description	See G8 and N5.

■ M9 - SEDOL Number of Preceding Record	
Туре	Text
Description	SEDOL number of preceding record, if any. See N6.

■ M10 - Reason for Death		
Туре	Code	

	Description	See G10 and N7.	
--	-------------	-----------------	--

■ M11 - SEDOL Number of Succeeding Record	
Туре	Text
Description	SEDOL number of succeeding record, if any. Also see N8.

SCOB Database (Brussels)

Abstract

The SCOB (Studiecentrum voor Beurs en Onderneming) Database includes end-of-the-month stock prices, dividends, interests, ex-dividend day and the number of stocks for all stocks ever quoted on the Brussels Stock Exchange. It furthermore contains information on (corporate) issuers and person (for instance company directors).

Creator: Studiecentrum voor Beurs en Onderneming (SCOB)

Funding Information

GOA-BOF UA

The initial transformation of the Official Price lists of the Brussels Stock Exchange into an Oracle Database was achieved within the project "The Cataloguising and the Digitising of the Brussels' Stock Exchange Archive" (1/1/1998-31/12/2002). This GOA (Concerted Research Actions) project received funding from the Special Research Fund (BOF) of the University of Antwerp (UA).

SCOB Oracle Database

Variable Count

₫ CORPORATION - UNIQUE IDENTIFIER for a particular issuer or organisation	
Туре	Numeric (Integer)
Description	This identifier ("CORPORATION") is used for any organisation (corporation, state, municipality)

■ NAME - Name of the issuer (corporation, state, municipality)	
Туре	Text
Description	Can have different names at the same moment as this field captures also TRANSLATED names

STARTDATE - Date of incorporation	
Туре	Date
Description	Can have successive days for every change of the name of the company

■ ENDDATE - ALWAYS 31/12/3999 FOR THE LAST TUPPLE LINKED TO THIS		
IDENTIFIER		
Туре	Date	
Description	Changes whenever a new location was identified	

■ SOURCE - Source where the information was found	
Туре	Text
Description	IF THE NAME CHANGES, a new tupple is added by the operator in order to capture all infomation in the price lists

₫ COMMENTS - Free comments	
Туре	Text

■ ADDRESS - Street name and number	
Туре	Text
Description	Can have successive names

E City	
Туре	Text
Description	Can have successive names

E Country	
Туре	Text
Description	Can have successive names

■ STARTDATE - Day for which this information holds	
Туре	Date
Description	Changes whenever a new location was identified

■ ENDDATE - ALWAYS 31/12/3999 FOR THE LAST TUPPLE LINKED TO THIS		
IDENTIFIER		
Туре	Date	
Description	IF THE NAME CHANGES, a new tupple is added by the operator in order to capture all infomation in the price lists	

■ ACTIVEPASSIVE - Identifies whether the item was an asset or liability

Туре	Text
Description	Always as it was officially registered

■ STARTDATE - Day of the balance sheet	
Туре	Date

■ ITEM - Particular name of the asset or liability	
Туре	Numeric (Integer)
Description	Always as it was officially registered

■ AMOUNT - Amount of the item	
Туре	Numeric (Integer)

d COMMENTS - Free comment, including the source	
Туре	Text
Description	If amounts are not in BEF or in EURO this is registered here

■ PROFITLOSS - Identifies whether the item was a cost or an income	
Туре	Text
Description	Always as it was officially registered

■ ITEM - Particular name of the cost or income

Туре	Numeric (Integer)
Description	Always as it was officially registered

■ STOCK - UNIQUE IDENTIFIER for a particular security	
Туре	Numeric (Integer)
Description	CAN HAVE SUCCESSIVE TUPPLES

■ NAME - NAME OF THE STOCK, BOND etc as found in the official price lists	
Туре	Text
Description	This field captures also additional information on the type of stock (bond), interest, payment days, multiple voting shares (as can be found in price lists)

■ STARTDATE - IPO day of the stock or bond	
Туре	Date

■ ID - UNIQUE IDENTIFIER for a particular security	
Туре	Numeric (Integer)
Description	Connects this identifier to the stock_name identifier, called "STOCK"

■ SHARETYPE - The type of security	
Туре	Numeric (Integer)
Description	This can be anything, also inscription rights, bonus rights

■ STOCKEXCHANGE - The name of the stockexchange	
Туре	Numeric (Integer)

■ STOCK - UNIQUE IDENTIFIER for a particular security	
Туре	Numeric (Integer)
Description	Connects this identifier to the stock_name identifier, called "STOCK"

■ CATEGORY - Industry code	
Туре	Numeric (Integer)

STARTDATE - First day for which this connection between stock and industry applies

Type

Date

ENDDATE - First day for which this connection between stock and industry applies

Type Date

Description ALWAYS 31/12/3999 FOR THE LAST TUPPLE LINKED TO THIS IDENTIFIER

STARTDATE - First day for which this connection between stock and issuer applies

Type Date

ENDDATE - Last day for which this connection between stock and issuer applies		
Туре	Date	
Description	ALWAYS 31/12/3999 FOR THE LAST TUPPLE LINKED TO THIS IDENTIFIER	

■ EX_COUPON - The day for which the coupon was detached from the stock or		
bond		
Туре	Date	
Description	This is not the payment day	

₫ COUPON - Coupon number (and additional information)	
Туре	Text
Description	If available; additional information can be for example "talon"

■ TYPE - Type of dividend or interest	
Туре	Numeric (Integer)
Description	Can be for example "first dividend", "second dividend"

■ DIVIDEND - Net dividend or interest		
Туре	Numeric (Integer)	

CURRENCY - The currency in which the interest or dividend was paid		
Туре	Numeric (Integer)	

Description	The number of the currency refers to the table in which all currencies are stored
F VEAR1 Assour	ting year for which the interest or dividend is naid
	ting year for which the interest or dividend is paid Text
Туре	Text
₫ YEAR2 - Accoun	ting year for which the interest or dividend is paid
Туре	Text
SOURCE - Sourc	e where the information was found
Туре	Text
E DRIITO DIVIDEI	ND Cross dividend or interest
	ND - Gross dividend or interest
Type	Numeric (Integer)
₫ ID - UNIQUE IDE	ENTIFIER
Туре	Numeric (Integer)
■ NAME - Official	name of the currency
Туре	Text
COUNTRY - Nan	ne of the country to which this currency belongs

Туре	Text		
------	------	--	--

☐ CURRENCY - UNIQUE IDENTIFIER for a particular currency	
Туре	Numeric (Integer)
Description	Connects this identifier to the currency identifier in the table "CURRENCY"

START_DATE - The day for which the exchange rate was found	
Туре	Date

■ END_DATE - The last day the registered exchange rate holds	
Туре	Date
Description	This day is identical to the next day for which a new exchange rate applies

THIS_CURRENCY - The amount of the foreign currency that is exchanged	
Туре	Numeric (Integer)
Description	For example : 100 US dollar

■ CORRECT_CURRENCY - The amount of the BEF or EURO for which the foreign		
amount can be exchanged		
Туре	Numeric (Integer)	
Description	For example : 100 US dollar = 512 BEF	

■ ARGENT - Bid price

Type Numeric (Integer)

■ PAPIER - Ask price

Type Numeric (Integer)

TYPE - The type of number or amount (Emitted, admitted to the stock exchange, in circulation)

Type Numeric (Integer)

■ STARTDATE - The day for which this amount or number is registered

Type Date

■ VOLUME - The number of stocks or bonds is given

Туре	Numeric (Integer)
Description	Always either "volume" or "value"

■ VALUE - The total amount issued (if no number of stocks or bonds is given)

Туре	Numeric (Integer)
Description	Always either "volume" or "value"

■ CURRENCY - The currency in which the total amount issued is given	
Туре	Numeric (Integer)
Description	If a "value" is given

■ ENDDATE - The last day for which the amount or number holds	
Туре	Date
Description	This day is identical to the next day for which a new amount or number applies

STARTDATE - The day for which this nominal value is registered	
Туре	Date

■ VALUE - Nominal value or number of stocks or bonds	
Туре	Numeric (Integer)

FRACTION - This column tells whether the column "value" has a nominal value	
or not	
Туре	Code
Description	Has to be y (yes) or n (no) YES means : there is no nominal value, the value of every stock is a fraction of the total amount of stocks. No means: There is a nominal value

ENDDATE - The last day for which this nominal value is registered	
Туре	Date
Description	This day is identical to the next day for which a new nominal value applies

■ VALUES_TEXT - If more than one nominal value is registered in the official price		
lists		
Туре	Text	
Description	This is often the case for government bonds with different coupures (for example 5000-2000) as registered in the official price lists	

SPLITDATE - The day of the capital operation	
Туре	Date

■ BEFORE - The number of stocks before the operation	
Туре	Numeric (Integer)
Description	For example: a reverse split (5 into 1) gives 5 in this column

■ AFTER - The adjusted number of stocks after the operation	
Туре	Numeric (Integer)
Description	For example: a reverse split (5 into 1) gives 1 in this column

SOURCE - Documents the type of capital operation and gives the source where information is found

Type

Text

■ TOSTOCK - UNIQUE IDENTIFIER for a particular security	
Туре	Numeric (Integer)
Description	Connects this identifier to the stock_name identifier, called "STOCK"

© CODETYPE - The type of code for a particular security	
Туре	Numeric (Integer)
Description	For example: 5 (ISIN code) , 11 (Eurhisfirm code)

STARTDATE - The first day for which this code is registered	
Туре	Date

☑ CODE - The name of the code	
Туре	Text
Description	For example (ISIN CODE): BE0003499077

■ ENDDATE - The last day for which this code is registered	
Туре	Date
Description	This day is identical to the next day for which a new code applies

■ STARTDATE - The first day for which this information holds	
Туре	Date

TYPE - The particular type of stock	
Туре	Numeric (Integer)
Description	All types have a numeric value, which is connected to a table STOCKTYPES (not shown)

ENDDATE - The last day for which this information holds	
Туре	Date

© COMPREF - Indicates whether this stock is a common or preferred type of sto	
Туре	Numeric (Integer)

■ ID - UNIQUE IDENTIFIER for a particular person	
Туре	Numeric (Integer)

■ NAME - Name of the person	
Туре	Text

₫ STARTDATE - Bir	STARTDATE - Birth day	
Туре	Date

7	In liquidation/dissolution: The instrument will be taken back following the sale of the company's or fund's assets and subsequent dissolution/liquidation.
8	Active

stock type (Eurofidai) - Codelist for STOCK_TYPE

Codelist for STOCK_TYPE

1	Preferred stock: Shares which give their holders priority of claim over the holders of other share categories, mainly with regard to the distribution of profits or in the event of the company's liquidation and the exercise of rights. Include also preference shares.
2	Common stock: An ordinary share gives the right to its owner to share in the profits of the company (dividends) and to vote at general meetings of the company. Also includes Company shares and Capital share.
4	VVPR Share: Share with special fiscal advantages and reduced withholding taxes (i.e. in Belgium).

5 Participating share dividend: Share of a company (e.g. in Belgium) with rights only to dividend or a part of the annual benefit distributed by this one and to the reserve benefits in case of dissolution of the company. Generally emitted in a capital growth action in order to recompense the new shareholders. Usually attributed to the first subscribers, this kind of 6 Founder's share: Beneficial part often given to the founders of a company and usually give rights to only part of the benefits. They are attributed to the founders of a company for their qualities or in remuneration of immaterial contributions (knowledge, relations, etc.) and differ from the other types of shares by one or another advantage. 7 Profit-sharing certificate : Share of a company with right only to a quote-part of its assets in the event of liquidation; it also gives sometimes right to a surplus dividend. They are distributed free of charges to the stockholders of redeemed (repurchased) capital shares. 8 Deferred Share: This share provided its holders with large dividend pay outs only after all other classes of shareholders are paid. Holders of deferred shares had access to all the remaining profits after all obligations were met. Subordinate to all other classes of common and preferred stock, these shares are last in line when a company goes bankrupt and liquidates all assets. 99 Other types of equity: Other types of equities not classified and units in terms of a compound of equities.

Dependency type code (Eurofidai) - Codelist for DEPENDENCY_TYPE_CODE

Codelist for DEPENDENCY_TYPE_CODE

1	Certificate/ depository receipt: Certificate/ depository receipt that is issued e.g. abroad, representing the original share or a specific amount of original shares
2	New share: New issue shares are usually issued on a capital increase and are not or not yet fully entitled to dividends
6	Same instrument as original: Same Instrument i.e. share corresponding with original share that is treated accordingly (e.g. foreign shares in Thailand, Hong-Kong or Bermuda registered in England or LONDON-Certificates registered in Germany)
15	Loyalty Bonus Shares: Shares issued to long time holders to benefit from special dividends or voting rights. Example: Under French law, companies may distribute bonus dividends to shareholders who have been holding their shares in registered form for a minimum period of two calendar years. The net bonus dividend due to shareholders of loyalty bonus shares may increase the net ordinary dividend by a maximum of 10%
21	Distribution right: Right given to the shareholders to receive securities during a distribution made by a company (distribution of share, warrant or other instruments)

Type of Death (LSPD) - Codelist for G10 & M10

Codelist for G10 & M10

0	Active
5	Acquisition/takeover/merger
6	Suspension/cancellation with shares acquired later. Meanwhile, may in some cases, be traded under rule 163(2)
7	Liquidation (usually valueless, but there may be liquidation payments)
8	Quotation cancelled (maybe suspended initially) as company becomes a private company, or there is insufficient trading in the shares. Dealings continue under rule 163(2) or (3) or rule 535 or Ofex or Plus or Specialist Funds Market (in the last case, the security remains on LSPD)
9	As for 8, but no dealings under rule 163

10	Quotation suspended – if suspended for more than three years, this may lead to automatic cancellation
11	Voluntary liquidation, where value remains and was / is being distributed
12	Changed to foreign registration
13	Quotation cancelled (sometimes for reason unknown). Dealings continue under rule 163(2) or (3)
14	As for 13, but no dealings under rule 163
15	Converted into an alternative security for the same company
16	Receiver appointed/liquidation. Probably valueless, but not yet certain
17	Unitisation of an investment or financial trust
18	Nationalisation
19	Enfranchisement
20	In Administration/Administrative receivership
21	Cancelled and assumed valueless or suspended but assumed valueless

SEDOL Group (LSPD) - Codelist for G16 & M4

58	Water Works
95	Alternative Investment Market
97	Third Market until 2000; Specialist Funds Market from 2007
98	Unlisted Securities Market
99	Other unlisted securities. This classification was created by the Stock Exchange for brokers wishing to deal in this type of securities under rule 535. The securities are not quoted, and the price figuring in the left column represents the broker's dealings. Because the dealings are occasional, companies are not obliged to report any changes (i.e. capital changes)

Stock Exchange Industrial Classification (LSPD) - Codelist for G17

Codelist for G17

The number in parentheses are the start and end date (YYYYMM-YYYYMM) of the period during which the industry code was in use.

Prior to 1994, the Stock Exchange industrial classification system differed from the Financial Times Actuaries index classification system. Since 1994, the two systems have been unified. From Jan 2006 the ICB industrial classification system has been adopted.

32	Price is over one month old

Price status (LSPD) - Codelist for P8

Codelist for P8

0	Not collected
1	Input and proceed normally
2	Failed validation checks of the Data Entry System but was confirmed from SEDOL
3	Price record input by database amended
4	Quotation suspended (only reliably available since 1965)
5	No third price/not found on SEDOL list
6	Flagged as missing or inconsistent with previous price but was confirmed from SEDOL
7	Obvious printing error. Correct price or date inferred
8	Suspicious price change checked against all sources (Extel cards, Capital Gains Tax Book) in 11/86 but no further information was found. When returns are greater than +/- 50% and no specific reason is found, a marker of 9 still remains.
9	Suspicious price or capital change. Because we do not have the relevant SEDOL listings for those years and because it took place before 1965 (when CGT book first appeared), those prices or capital changes should be checked against Extel cards at Extel, or against SEDOL listings at the Guildhall library.

Reason for new SEDOL (LSDP) - Codelist for N5

69	Type of birth not known either because no date was recorded in the Extel cards or C.G.T. book, or because the actual birth date was long before we started collecting data
70	Management Buy-out
71	Placing combined with an open offer to shareholders
72	Placing combined with an intermediaries offer
73	Placing combined with offer to public
74	Issued under scheme/proposal to common holders or ordinary holders
75	Spinoff from another company
76	Exchange offer (usually Investment Trust company)
77	Issued against split of units
78	Issued in acquisition
79	Acquisition combined with placing
80	Issued in capital reorganisation
81	Exchange offer combined with offer for sale
82	Placing combined with rollover from another trust
83	Rollover combined with other offer
84	Scrip issue combined with placing and other offer
85	Placing combined with other offer and rollover
86	Demutualisation combined with other offer
87	Placing combined with rights issue or open offer

Reasons for new name record (LSPD) - Codelist for N7

Codelist for N7

1	Change of name
2	Change of SEDOL group
3	Change of SEDOL number

4	Reorganisation/Merger
5	Acquisition/takeover/merger
6	Suspension/cancellation with shares acquired later. Meanwhile, may be traded under rule 163(2)
7	Liquidation (usually valueless, but there may be liquidation payments)
8	Quotation cancelled (maybe suspended initially) as company becomes a private company, or there is insufficient trading in the shares. Dealings continue under rule 163(2) or (3) or rule 535 or Ofex or Plus or Specialist Funds Market (in the last case, the security remains on LSPD)
9	As for 8, but no dealings under rule 163
10	Quotation suspended – if suspended for more than three years, this may lead to automatic cancellation
10	Suspension
11	Voluntary liquidation, where value remains and was / is being distributed
12	Changed to foreign registration
13	Quotation cancelled for reason unknown. Dealings continue under rule 163(2) or (3)
14	As for 13, but no dealings under rule 163
15	Converted into an alternative security for the same company
16	Receiver appointed/liquidation. Probably valueless, but not yet certain
17	Unitisation of an investment or financial trust
18	Nationalisation
19	Enfranchisement
20	In Administration/Administrative receivership
21	Cancelled and assumed valueless or suspended but assumed valueless

Source Variables

🎒 Prijscourant (Amsterdam) - Amsterdam Stock Exchange official price list

Amsterdam Stock Exchange official price list

The Prijscourant published only spot prices. Prices are normally quoted as a percentage of nominal value, in fractional format (denominations of one-sixteenth). In those rare cases where prices are quoted in gulden per unit (Dutch: eensgevend geld), the price, in decimal format, is preceded by the abrreviation "f." (short for florin or gulden). Prices of fixed-income securities are quoted interest excluded; variable-income securities are quoted dividend included.

Column headings were the same for all types of securities, i.e. no distinction was made between fixed- and variable-income securities.

- No. coup. of divid. Coupon number
- Bedrag der leverbare stukken Nominal value
- Vervaldagen der coupons Interest payment date
- Namen der fondsen Identification of the issue
- Procent Interest rate
- Vorige koers Previous price
- Laagste koers Lowest price of the day
- Hoogste koers Highest price of the day
- Gebleven koers Closing price

Туре	Numeric (Integer)
Measurement Unit	Curreny (gulden in case of demostic securities or other in case of foreign securities)
Description	Par or face value of a security. The amount is preceded by an abbreviation (e.g. f, Fr, RM, RB, Kr, Lr) or symbol (e.g. \$ or £) indicating the currency. The nominal values of domestic securities are indicated in guldens; those of foreign securities in their native currency. In case multiple denominations are available, the nominal values are separated by a dash (-).

Vervaldagen der coupons - Interest payment date	
Туре	MonthDay
Description	In case of fixed-income securities (e.g. bonds and debentures), the date (or dates in case interest is paid semi-anually) from which coupons can be exchanged for interest is included in this column. In case of variable-income securities (e.g. shares), the abrreviation "divid." is included in this column.

Namen der fondsen - Identification of the issue	
Туре	Text
Description	Minimally includes the name of the issuing entity (company or public body) (issuer) and the type of securities (for instance, "oblig." for bonds and "aand." for shares). If a company had more than one class of shares listed, the share class is also indicated. For bonds, the year of issue may be included. If the interest rate of a fixed-income security (e.g. bonds and debentures) is included, the issuer has suspended interest payments (defaulted security). Defaulted securities are also indicated by an asterisk (*).

Procent - Interest rate	
Туре	Numeric (Integer)
Measurement Unit	Percentage of nominal value

Description	Annual interest rate of fixed-income securities (e.g. debentures). This column is left
	blank in case of (1) variable-income securities (e.g. shares) and (2) defaulted fixed-
	income securities (e.g. bonds and debentures). If the issuer suspended interest
	payments on a fixed-income security, the interest rate is included in the previous
	column ("Namen der fondsen").
	column ("Namen der fondsen").

Vorige koers - Previous price	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value (occasionally gulden per unit)
Description	This is the mid price (i.e. the mean of the highest and lowest price) of the previous day the security was traded. If a security has not been traded for a month, this column is left blank.

■ Laagste koers - Lowest price of the day	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value (occasionally gulden per unit)
Description	This is the lowest price at which a security traded during the day the official list was published.

Hoogste koers - Highest price of the day	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value (occasionally gulden per unit)
Description	This is the highest price at which a security traded during the day the official list was published.

Gebleven koers - Closing price	
Туре	Numeric (Other)

Measurement Unit	Percentage of nominal value (occasionally gulden per unit)
Description	This is the last price at which a security traded on the day the official list was published.

Berliner Börsen-Zeitung (Berlin) - Berlin Stock Exchange official price list

Berlin Stock Exchange official price list

The description is based on lists from the year 1920. At the time, there was no forward market in Berlin. Hence, all published prices are spot prices.

For most securites traded on the spot market, one price per day was quoted. These quotations are accompanied by abbreviations which indicated to which degree orders were effected at the given price. For instance, if all orders have been fullfilled at the given price, the price is followed by the abbreviation "bz." which is short for "bezahlt" (a full list of abbreviations can be found in D4.3). Only a limited number of securities was quoted continuously. Their prices were quoted in a separate section ("Papiere mit variablen Kursen").

Prices are normally quoted as a percentage of nominal value. In those rare cases where the price of shares is quoted as an amount per piece (for instance, for shares which have been partially redeemed), this is indicated by the abrreviation "MpSt." (short for "Mark pro Stuck" or "Mark per piece"). Shares of insurance companies were always quoted in Mark per piece and are published in a separate section.

This set has no items.

Obligationen industrieller Gesellschaften - Corporate bonds

Corporate bonds

This section includes the prices of bonds issued by industrial companies. Prices of bonds issued by banks and railway companies were published in separate sections, but the columns are the same as those of bonds issued by industrial companies.

Items

- Berliner Börsen-zeiting (Berlin) First column (Untitled) Identification of the issue
- Berliner Börsen-zeiting (Berlin) Second column (Untitled) Redemption value
- Z.F. Interest rate
- Z.-T. Interest payment date

- Heute Price
- Gestern Previous price

Berliner Börsen-zeiting (Berlin) First column (Untitled) - Identification of the issue	
Туре	Text
Description	Minimally includes the name of the issuing company (issuer). Multiple issues from the same issuer are distinguished by the year of issue. An asterisk (*) indicates that a particular issue is not secured by a mortgage ("Die mit *) versehenen Obligationen sind nicht hypothekarisch sichergestellt.")

Berliner Börsen-zeiting (Berlin) Second column (Untitled) - Redemption value	
Туре	Numeric (Integer)
Measurement Unit	Percentage of nominal value
Description	This is the amount at which debentures are redeemed.

Z.F Interest rate	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value
Description	This is the annual rate of interest for fixed-income securities.

ZT Interest payment date	
Туре	MonthDay
Description	This is the date (or dates in case interest is paid semi-annually) from which coupons can be exchanged for interest.

Heute - Price	
Туре	Numeric (Decimal)

Measurement Unit	Precentage of nominal value
Description	This is the price which was quoted on the day the official list was published. [Note: Prior to the first World War, multiple prices are quoted for shares traded at the forward market (Terminmarkt).]

Gestern - Previous price	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value
Description	This is the price which was quoted on the day before the day the official list was published.

Aktien von industriellen und Bergwerks-Gesellschaften - Corporate shares

Corporate shares

Some column headings are context-specific, i.e. the years in the headings of columns with information on dividends change yearly. Shares issued by banks and railway companies were published in separate sections, but the columns are the same.

Items

- Berliner Börsen-zeiting (Berlin) First column (Untitled) Identification of the issue
- Div. [y-3, e.g. 17] Dividend for year-3
- Div. [y-2, e.g. 18] Dividend for year-2
- Div. [y-1, e.g. 19] Dividend for year-1
- Geschftsj. Start date of fiscal year
- Stücke zu Nominal value
- Heute Price
- Gestern Previous price

Berliner Börsen-zeiting (Berlin) First column (Untitled) - Identification of the issue	
Туре	Text

Description	Minimally includes the name of the issuing company (issuer). If a company had more than one class of shares listed, the share class (e.g. Vorzugsaktien or preffered shares)
	is also indicated.

Div. [y-3, e.g. 17] - Dividend for year-3	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value
Description	This is the amount of the dividend paid for the third last fiscal year

Div. [y-2, e.g. 18] - Dividend for year-2	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value
Description	This is the amount of the dividend paid for the second last fiscal year.

Div. [y-1, e.g. 19] - Dividend for year-1	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value
Description	This is the amount of the dividend paid for the previous fiscal year. A symbol (°) is added if the amount of the dividend has already been declared, but the payment date is not yet determined (" ° bedeutet, dass die Dividende auf den angegebenen Betrag festgesetzt, Termin de Auszahlung aber nch nicht bestimmt ist").

Geschftsj Start date of fiscal year	
Туре	MonthDay

Stücke zu - Nominal value

Туре	Numeric (Integer)
Measurement Unit	Currency (Deutsche Mark for domestic securities or other for foreign securities)
Description	This is the par or face value of shares. This column may include more than one value if multiple denominations are available. Notes in the margin indicate if the share capital has been partially redeemed.

Heute - Price	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal vallue (occasionally Deutsche Mark per unit)
Description	This is the price which was quoted on the day the official list was published.

Gestern - Previous price	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value (occasionally Deutsche Mark per unit)
Description	This is the price which was quoted on the day before the day the official list was published.

Insurance company shares

Shares of German insurance companies were quoted differently from other corporate shares (i.e. in Deutsche Mark per unit) and, consequently, treated in a separte section with different columns.

Items

- Berliner Börsen-zeiting (Berlin) First column (Untitled) Identification of the issue
- % Paid-up value of shares
- Div. 17 Dividend for year-3
- Div. 18 Dividend for year-2

Description	These are subsequent prices at which securities traded during the day the official list was published. Prices are separated by the letter "à".

Cours authentique (Bruxelles) - Brussels Stock Exchange official price list

Brussels Stock Exchange official price list

The description is based on lists from the year 1925. More securities were listed on the spot market, but the forward market (marché à terme) was more liquid. Spot and forward prices were reported in different sections.

This set has no items.

The Brussels Stock Exchange official price list has different columns for fixed-income and variable-income securities listed on the spot market.

Obligations, Actions à revenu fixe - Fixed-income securities

Fixed-income securities

Prices of fixed-income securities were quoted in Belgian francs per unit, in decimal format. Interest is included in the price.

- Titres admis Number issued
- Titres en circulation Number outstanding
- Designation des valeurs Identification of the issue
- Intérêts Interest rate
- Impots Tax rate
- Écheances des intérêts Interest payment dates
- Valeur nom. Francs Nominal value
- Dates des tirages Draw dates
- Cours faits Price
- Cours précédents Previous price

Titres admis - Number issued	
Туре	Numeric (Integer)
Description	The total number of securities beloning to a particular issue that were initially floated on the stock exchange. The actual number outstanding might be smaller because of premature redemption.

Œ	Titres en circulation - Number outstanding	
Тур	e	Numeric (Integer)

Description	The total number of securities belonging to a particular issue that were outstanding on the day the official list was published. This number may decline over time because
	of premature redemption of debentures.

Designation des valeurs - Identification of the issue	
Туре	Text
Description	Minimally includes the name of the issuing entity (issuer). Multiple issues from the same issuer are distinguished by the year of issue.

Intérêts - Interest rate	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value
Description	This is the annual interest rate.

Impots - Tax rate	
Туре	Numeric (Other)
Description	The rate of the withholding tax on intersts, to be paid by the bondholder. The letter "N" means the issuer paid the tax.

ÉLÉcheances des intérêts - Interest payment dates	
Туре	MonthDay

Туре	Text
Description	This column described how debentures are redeemed (for instance, "Sorteo" in case the debenture is redeemed by drawings).

Cupón bruto - Gross amount of interest	
Туре	Numeric (Decimal)
Measurement Unit	Currency (peseta)
Description	This is the amount of interest before tax. The amount is per coupon, not per fiscal year.

Cupón neto - Net amount of interest

Туре	Numeric (Integer)
Description	This is the amount of interest after tax. The amount is per coupon, not per fiscal year.

Venicimiento de las cupones - Interest payment date	
Туре	Date
Description	This is the date from which the next coupon is payable.

Nominal - Nominal value	
Туре	Numeric (Integer)
Measurement Unit	Currency (peseta)
Description	Par or face value of securities.

Interés - Interest rate	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value
Description	Annual rate of interest.

Obligaciones - Identification of the issue	
Туре	Text
Description	Minimally includes the name of the issuing entity (issuer). Multiple issues from the same issuer are distinguished by the year of issue.

Operación precedente Cambio - Previous price	
Туре	Numeric (Decimal)

Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	This is the last price of the previous day the security was traded.

Operación precedente Fecha - Date of previous price	
Туре	Date
Description	This is the day on which the previous price of the security was quoted.

Ofertas Papel - Bid quote	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	This is a bid price for the security.

Ofertas Dinero - Ask quote	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	This is an ask price for the security.

Cambios publicados - Prices	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	These are the subsequent prices at which securities traded during the day on which the official list was published.

Cambio de compensación - Settlement price

Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)

Durante el año Más alto - Highest price of the year	
Туре	Numeric (Integer)
Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	This is the highest price at which securities traded on the spot market from January 1st of the year the official list was published.

Durante el año Más bajo - Lowest price of the year	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	This is the lowest price at which securities traded on the spot market from January 1st of the year the official list was published.

Forward market

The prices of fixed- and variable income securities were reported in the same table, but different sections were devoted to the securities of domestic and foreign companies. The columns were the same, however.

Securities of domestic companies

- Operaciones precedentes | Fecha Date of previous forward price
- Operaciones precedentes | Cambios Previous forward prices

- Clase de efectos y plazo Identification of issue and liquidation date
- Cambios publicados Forward prices
- Ofertas Papel Forward ask quotes
- Ofertas Dinero Forward bid quotes

Operaciones precedentes Fecha - Date of previous forward price	
Туре	Date

Operaciones precedentes Cambios - Previous forward prices	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)

Clase de efectos y plazo - Identification of issue and liquidation date	
Туре	Text
Description	The identification minimally includes the name of the issuing entity (company or public body) (issuer). If a company had more than one class of shares listed, the share class is also indicated. For bonds, the year of issue may be included. The liquidation date clould be either the end of the current month ("fin corriente") or at the end of the next month ("fin próximo").

Cambios publicados - Forward prices	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	These are subsequent forward prices quoted during the day the official list was published for liquidation on the date indicated in the previous column ("Clase de efectos y plazo").

Ofertas - Papel - Forward ask quotes

Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	This is a forward ask price.

Ofertas - Dinero - Forward bid quotes	
Туре	Numeric (Decimal)
Measurement Unit	Percentage of nominal value or curreny (peseta)
Description	This is a forward bid price.

Cours authentique (Paris) - Paris Stock Exchange official price list

Paris Stock Exchange official price list

The description is based on the official lists from 1925. The official lists of the Paris Stock Exchange has separate tables for securities which were listed only on the spot market and on both the spot and forward markets. No further distinction is made between fixed- and variable-income securities. Bonds and shares were quoted in French francs per unit. Prices of securities which were not paid-up in full needed to be reduced accordingly. Shares of insurance companies present an exception in this case. Insurance companies' shares were quoted using the net à payer method. The price mentioned in the official list is the actual amount that the buyer had to pay to the seller. Dividends and interest are included in the prices of shares and bonds (dirty prices).

This set has no items.

Cash market only

- Montant des emprunts admis ou nombre de titres Total amount or number of securities issued
- Période d'amortissement Term to maturity
- Dates des tirages effectués Draw dates
- Taux d'émission Issue price

- Epoques de jouissance Coupon payment dates
- Intérêts et dividendes | Exercice précédent (brut) Gross amount of coupon paid for the previous fiscal year
- Intérêts et dividendes | Dernier coupon payé | Brut Gross amount of the last coupon paid
- Intérêts et dividendes | Dernier coupon payé | Impôts à deduire Amount of tax
- Derniers cours cotés au comptant Closing spot price
- Clôture de la veille Previous spot price
- Designation des valeurs Identification of the issue
- Jouissance courante Payment date of the current coupon
- Comptant Spot prices
- Cours extrêmes depuis le 1er Janv. 1925 au comptant | Plus bas Lowest spot price of year
- Cours extrêmes depuis le 1er Janv. 1925 au comptant | Plus haut Highest spot price of year

Montant des emprunts admis ou nombre de titres - Total amount or number of securities issued	
Туре	Numeric (Integer)
Measurement Unit	May be currency (French francs in case of domectic securities, or other in case of foreign securities)
Description	The total amount or number of securities initially floated on the stock exchange. The actual amount or number outstanding might be smaller because of premature redemption.

Période d'amortissement - Term to maturity	
Туре	Duration
Description	This is the number of years to maturity, i.e. the number of years before the debenture loan is completely redeemed.

Dates des tirages effectués - Draw dates	
Туре	Date
Description	This column includes the date on which numbers of shares that would be redeemed were drawn.

Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Issue price of secturities

Epoques de jouissance - Coupon payment dates	
Туре	Date
Description	This is the date (or dates in case interest or dividends are paid semi-annually) from which coupons could be exchanged for interest or dividends.

Intérêts et dividendes Exercice précédent (brut) - Gross amount of coupon paid for the previous fiscal year	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs in case of domestic securities, other in case of foreign securities)
Description	This is the gross amount of interest or dividends paid for the previous fiscal year.

Intérêts et dividendes Dernier coupon payé Brut - Gross amount of the last coupon paid	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs in case of domestic securities, other in case of foreign securities)
Description	This is the gross amount of interest or dividend of the last coupon paid.

Intérêts et dividendes Dernier coupon payé Impôts à deduire - Amount of tax	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs in case of domestic securities, other in case of foreign securities)
Description	This is the amount of the tax on interest or dividends.

Derniers cours cotés au comptant - Closing spot price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	This is the last price at which a security traded on the spot market on day the official list was published.

Clôture de la veille - Previous spot price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	This is the last spot price of the previous day the security was traded.

Designation des valeurs - Identification of the issue	
Туре	Text
Description	Minimally includes the name of the issuing entity (company or public body) (issuer) and the type of securities (usually abbreviated as "obl." for bonds and "act." for shares). For bonds, the year of issue may be included, in addition to the nominal value, the interest rate and redemption price. For shares, the share class may be included if a company had more than one class of shares listed, in addition to the nominal value and the amount paid-up (in case the amount is paid-up in full, the nominal value is followed by the abbreviation "t.p." for "tout payé"). This column may also include the number of the last detached coupon (preceded by the abbreviation "ex-c." for "ex-coupon").

Jouissance courante - Payment date of the current coupon	
Туре	Date
Description	This is the date from which the current (last attached) coupon is payable.

Comptant - Spot prices	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Subsequent prices at which securities traded on the spot market during the day the official list was published.

Cours extrêmes depuis le 1er Janv. 1925 au comptant Plus bas - Lowest spot price of year	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Lowest price at which securities traded on the spot market from January 1st of the year the official list was published.

Cours extrêmes depuis le 1er Janv. 1925 au comptant Plus haut - Highest spot price of year	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Highest price at which securities traded on the spot market made from January 1st of the year the official list was published.

Montant des emprunts admis ou nombre de titres - Total amount or number of securities issued	
Туре	Numeric (Integer)
Measurement Unit	May be currency (French francs in case of domectic securities, or other in case of foreign securities)
Description	The total amount or number of securities initially floated on the stock exchange. The actual amount or number outstanding might be smaller because of premature redemption.

Epoques de jouissance - Coupon payment dates	
Туре	Date
Description	This is the date (or dates in case interest or dividends are paid semi-annually) from which coupons could be exchanged for interest or dividends.

Intérêts et dividendes Exercice précédent (brut) - Gross amount of coupon paid for the previous fiscal year	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs in case of domestic securities, other in case of foreign securities)
Description	This is the gross amount of interest or dividends paid for the previous fiscal year.

Intérêts et dividendes Dernier coupon payé Brut - Gross amount of the last coupon paid	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs in case of domestic securities, other in case of foreign securities)
Description	This is the gross amount of interest or dividend of the last coupon paid.

Intérêts et dividendes Dernier coupon payé Impôts à deduire - Amount of tax	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs in case of domestic securities, other in case of foreign securities)
Description	This is the amount of the tax on interest or dividends.

Clotûre de la veille (comptant) - Previous spot price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	This is the last spot price of the previous day the security was traded.

Désignation des valeurs - Identification of securities	
Туре	Text
Description	Minimally consists of the name of the issuer. If more than one type of security is listed, the type of security is also mentioned. For government loans ("emprunts"), the year of issue is always included. This field includes frequent abbreviations and heavy use of the ditto mark (").

Jouissance courante - Payment date of the current coupon

Туре	Date
Description	This is the date from which the current (last attached) coupon is payable.

Comptant - Spot prices	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Subsequent prices at which securities traded on the spot market during the day the official list was published.

Cours extrêmes depuis le 1er Janv. 1925 au comptant Plus bas - Lowest spot price of year	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Lowest price at which securities traded on the spot market made from January 1st of the year the official list was published.

Cours extrêmes depuis le 1er Janv. 1925 au comptant Plus haut - Highest spot price of year	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Highest price at which securities traded on the spot market made from January 1st of the year the official list was published.

Cours du terme Report liq. à l'autre - Repo price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)

Description	Reports or repos were collateralized borrowing instruments. They coupled a spot sale of an asset with the commitment to repurchase the same asset at the following settlement. The repo price for an asset was therefore the price paid by the forward
	trader to roll over its position on that particular asset from a settlement to the following one.

Cours du terme Cours de compens Settlement price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)

Cours du terme Clôture de la veille - Previous forward price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	This is the last spot price of the previous day the security was traded.

Cours du terme [blank] - Settlement dates	
Туре	Text
Description	Through a forward contract, two parties committed to buy or to sell an asset at a specified future date, the settlement date or delivery date. At the settlement date, forward buyers (sellers) were committed to fulfill their purchase (sale) obligation.

Cours du terme 1er cours - Opening forward price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	First price of the day at which securities traded on the forward market on the day the official list was published.

Cours du terme Plus haut - Highest forward price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Highest price of the day at which securities traded on the forward market on the day the official list was published.

Cours du terme Plus bas - Lowest forward price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Lowest price of the day at which securities traded on the forward market on the day the official list was published.

Cours du terme Dernier cours - Closing forward price	
Туре	Numeric (Decimal)
Measurement Unit	Currency (French francs)
Description	Last price of the day at which securities traded on the forward market on the day the official list was published.

- Gewinn- und Verlust-Konto Profit-and-loss account
- Kurs End-of-year share prices

- Dividende Dividends
- Direktion Management board
- Aufsichtsrat Supervisory board
- Zahlstellen Financial service providers

Gegründet - Entity history	
Туре	Text
Description	Generally includes the date of incorporation (i.e. the deed of incorporation, sometimes the date of registration is also given), but may also included additional information on predecessors, changes in legal form, former registered addresses, names of founders, dates of changes in the articles of incorporation, start date and duration of concessions, etcetera.

Zweck - Purpose	
Туре	Text
Description	This subsection includes a description of the statutory purpose or object of the company. It may also include additional information on production sites (facturies, mines, tram- and railway networks, etcetera), machinery, production figures, number of employees etcetera.

Kapital - Share capital	
Туре	Text
Description	This subsection contains information on the current and historical capital of the company. First, the current total amount of share capital, the number of shares and the nominal value of shares is given. This is followed by a chronicle of capital operations from incorporation. It may also include information on principal shareholders (name, location,).

Anleihen - Debentures	
Туре	Text

Description	This subsection contains information on debenture loans, i.e. the date (year) of issue, the amount, the interest rate, the redemption price, the date of approval by the general assembly, the available denominations (nominal values), coupon (interest)
	payment dates, the maturity date, the method of redemption, the annual draw date (if applicable), the number or amount outstanding ("noch in Umlauf"), the cashiers ("Zahlstelle"), the stock exchanges where bonds were listed, the date of first listing, the introduction price and the end-of-year prices for previous years.

Geschäftsjahr - Fiscal year	
Туре	Timespan
Description	Start and end date of the company's fiscal year.

GenVers General assembly of shareholders	
Туре	Other
Description	This is the date of the annual general assembly of shareholders. It is generally expressed in very general terms, e.g. "Im I. Quartal" (During the first quarter) or "I. Geschäftshalbj." (During the first half of the fiscal year).

Stimmrecht - Shareholder's voting rights	
Туре	Text
Description	This subsection contains a description of shareholder's voting rights at the general assembly. This may include the number of votes per share (of different denominations and/or classes if applicable), the maximum number of votes a shareholder can cast etcetera.

Gewinn-Verteilung - Allocation of profit	
Туре	Text

This subsection contains a description of the statutory rules for the allocation of profit
between shareholders (of different classes if applicable), managers (Vorstand),
supervisory directors (Aufsichtsrat), reserves, etcetera.

Bilanz - Balance sheet	
Туре	Text
Description	This subsection included a balance sheet of the fiscal year ending at the indicated date. The balance sheet is presented as two paragraphs of text, assets ("Aktiva") and liabilities ("Passiva"). There was no standardisation of items. Subtotals are included.

Gewinn- und Verlust-Konto - Profit-and-loss account	
Туре	Text
Description	This section contains a profit-and-loss-account for the fiscal year ending at the indicated date. The profit-and-loss account is presented in several paragraphs. Each paragraph includes a section from the account. There was no standardisation of items. Subtotals are included.

Kurs - End-of-year share prices	
Туре	Text
Description	Contains a comma-delimited series of annual end-of-year prices of shares of different classes (if applicable) at different stock exchanges in Germany (if applicable) during the period indicated. The prices are reported as a percentage of nominal value.

Dividende - Dividends		
Туре	Text	
Description	Contains a comma-delimited series of annual dividends paid to shareholders of different classes (if applicable) during the period indicated. The amount of the dividends is reported as a percentage of nominal value.	

🔁 Direktion - Management board	
Туре	Text
Description	This section contains information on the members of the management board. Included are the first and last name of directors, their profession and the locality of their residence.

Aufsichtsrat - Supervisory board	
Туре	Text
Description	This section contains information on the members of the supervisory board. Included are the first and last name of supervisory directors, their profession and the locality of their residence.

Zahlstellen - Financial service providers	
Туре	Text
Description	This subsection includes the names and locations of financial service providers, i.e. banks where share- and bondholders could cash their coupons.

Office - Registered office address	
Туре	Text
Description	This subsection includes the street address and locality of the company's registered office, as well as other contact information sucs as telegraphic addresses and telephone numbers.

Directors - Names of directors	
Туре	Text
Description	This subsection contains a comma-delimited list of names of directors. Included are the first name (or initials), last name and function of each director. The function (e.g. chairman, managing,) is included in brackets ("()") after the last name. The shareholding qualification for the directors (this is the minimum number or amount of shares requiered by the articles of association for holding the position of director in a particular company) is also included in brackets ("()") after the subsection title if applicable.

Secretary - Name of company secretary	
Туре	Text
Description	First name (or initials) and last name of the secretary of the company.

Auditors - Name of company auditor	
Туре	Text
Description	First name (or initials) and last name of the auditor(s) of the company.

Solicitors - Name of company solicitor	
Туре	Text
Description	First name (or initials) and last name of the solicitor(s) of the company.

Bankers - Name of company bank	
Туре	Text
Description	Name of the company's bank(s).

Stock Exchange official-yearbook (London) Untitled - Date of registration	
Туре	Date
Description	This is the date of registration of the company by the Registrar of Companies. This subsection may also include a history of name changes, reconstitutions etcetera if applicable.

Stock Exchange official-yearbook (London) Untitled - Purpose and activities	
Туре	Text
Description	This subsection contains a short description of the company's purpose and principal activities. Particular reference is made to production and distribution facilities (e.g. factories, plantantions, branches, outlets, ships,) and their location, acquisitions and companies controlled by the company (i.e. portfolio).

Capital - Share capital		
Туре	Text	
Description	This subsection includes information on the current and historical capital of the company. First, the current total authorised and issued amount of share capital and the number, nominal value and paid-up amount of shares of various classes is given. This is followed by a chronicle of capital operations from incorporation. It further includes a description of the rights of preference shares to dividends and the liquidation balance (if applicable) and information on quotations. The latter includes the classes of shares and sometimes also the serial numbers of shares admitted to the Official List, the highest and lowest price ("price range") of shares during the previous year (at the London Stock Exchange), and the localities of other exchanges where shares were listed.	

☑ Voting - Shareholder's voting rights	
Туре	Text
Description	This subsection contains information on shareholder's voting rights at the general assembly. For each class of shares, it gives the number of votes per share.

Director's borrowing powers - Debenture loans	
Туре	Text
Description	This subsection includes information on company debt. It starts with a description of the statutory borrowing powers allocated to the directors by the articles of association. If applicable, it continues with an overview of subsequent debenture loans. For each debenture loan, it includes the name and interest rate; the total amount authorised, issued and outstanding; the date of issue and the price at issue (in percent of par value); information on the trust deed (date, names of trustees, description of the collateral); information on the redemption of the loan (e.g. date of maturity, method of redemption and redemption premium); interest payment dates; form (e.g. registered) and nominal value of bonds. If bonds were publicly traded, the subsection is concluded with information on the quotations of bonds (e.g. markets at which they were listed and highest and lowest prices during the previous year).

Accounts & dividends Accounts to Last day of fiscal year	
Туре	MonthDay

Accounts & dividends Submitted in Date of submission of last annual accounts	
Туре	YearMonth

Accounts & dividends Recent dividends - Amount of dividends in previous years	
Туре	Numeric (Other)
Measurement Unit	Percentage of nominal value

Description	This subsection included the amount of dividends (as a percentage of nominal value)
	paid to different classes of shares (if applicable) during the years indicated.

Accounts & dividends Untitled - Balance sheet items	
Туре	Text
Description	This subsection includes information on certain items from the balance sheet, particularly the amount carried forward to the next fiscal year and the amount of reserves (general and special).

Transfers, &c Transfer and registration of shares	
Туре	Text
Description	This subsection contains a description on the formalities and fees for the transfer and registeration of shares.

Annuaire Desfossés (Paris) Unititled - Information on incorporation	
Туре	Text

Description	This untitled subsection includes information on the incorporation of the company, i.e. the legal form, the date of incorporation ("constitution") and the duration or
	expiry date of the company.

Objet - Purpose	
Туре	Text
Description	This subsection contains a description of the statutory purpose of the company. An enumeration of the locations of production sites may also be included.

Siège - Registered office	
Туре	Text
Description	This subsection includes the locality and street address of the company's registered office.

Capital - Share capital	
Туре	Text
Description	This subsection contains information on the current and historical capital of the company. First, the current total amount of share capital, the number of shares and the nominal value of shares is given. This is followed by a chronicle of capital operations from incorporation.

Parts de fondateur - Founder shares	
Туре	Numeric (Integer)
Description	This section includes the number of founder shares.

Emprunt par obligations - Debenture loans

Туре	Text
Description	This subsection contains a chronicle of debenture loans, i.e. the total number and nominal value of bonds, the interest rate, the date of issue, the number outstanding ("en circulation"), the maturity date, the method of redemption, the annual draw date (if applicable) and coupon (interest) payment dates.

Conseil d'administration - Board of directors	
Туре	Text
Description	This subsection contains information on the board of directors of the company. First, general information on the minimum and maximum number of directors, the duration of their term and shareholding qualifications for directors is given. This is followed by a list of the initials and last names of the directors.

Assemblé générale - General assembly of shareholders	
Туре	Text
Description	This subsection contains general information on the general assembly and voting rights of shareholders, i.e. the date of the annual meeting, the number of votes per share, the maximum number of votes per shareholder and the number of days before the meeting securities have to be consigned to participate and vote at the general assembly ("dépot des titres").

Répartition des bénéfices - Allocation of profits	
Туре	Text
Description	This subsection includes a description of the statutory rules for the allocation of profit.

Service financier - Financial service provider	
Туре	Text

Description	Names (and sometimes locations) of financial service providers, i.e. banks where
	share- and bondholders could cash their coupons.

Inscription à la côte - Markets on which securities were listed	
Туре	Text
Description	This section includes the markets where the different types and classes of securities issued by the company were listed (e.g. "marché en banque, au comptant: actions").

Année sociale - Fiscal year	
Туре	MonthDay
Description	This subsection includes the end date of the company's fiscal year.

Bilan - Balance sheet	
Туре	Text

Description

This subsection includes a balance sheet for the company on the date indicated in the subsection heading (for instance, "Bilan au 30 septembre 1919"). Balance sheet items are presented in two columns: assets ("Actif") and liabilities ("Passif"). There was no harmonisation of items before 1936. Subtotals are included.

From 1936, efforts were made to introduce a certain homogeneity in the presentation (see the note on pages V and VI of the 1936 edition). In particular, liabilities started being divided into five items (labelled A to E) and assets were divided into four items (labelled F to I). Liability items are sorted in ascending order of payability and the active liquidity positions by increasing order:

Liabilities:

- Capital, Issue premiums ("primes d'émission" in French), Reserves (of all kinds, legal, extraordinary, deferred profits), Provisions.
- Consolidated Debt, Bonds, Debt securities, any term debts.
- Floating debt: all debts due.
- Dividends and bonuses, including, if applicable, advances paid.
- Accounts of order, if any.

Assets:

- Non-current assets: Formation expenses, Reimbursement premiums, Buildings, Plants, Concessions, Equipment, etc. with deduction of the corresponding depreciation, Supply (when it is materiel to be immobilized), Securities and equity securities (when equity securities have some permanence or may be deemed as non-current).
- Realisable assets: Stocks, Debtors, Securities (when they are temporary investments), Notes receivable, etc.
- Available assets: Banks and cash.
- Order accounts if applicable (i.e. if the nature of the accounts is not specified). Possible losses.

This pattern is still in use until the 1953 edition, except for the balance sheets of companies that have adopted the presentation of the "Plan comptable". In this case, the latter applies (see the note on page 12 of volume 2 of the 1953 edition).
